

Enhance business agility by weaving security into your DNA

Make security an intrinsic part of your digital fabric.

What's going on in the market?

71%

of executives say that cybersecurity concerns impede innovation at their organisation.

69%

of organisations now recognise security as a business enabler rather than a business blocker.

60%

of organisations are not embedding security at the start of business initiatives.

The traditional view of cybersecurity

is no longer fit for purpose

To compete in a modern marketplace you need to be able to adapt to opportunities in real-time.

This requires unprecedented digital agility and flexibility whilst also maintaining security and data integrity.

You need a solution that weaves real-time security telemetry and response into every part of your digital fabric.

Introducing...

Enables digital agility by bringing a business context to the security environment.

Removes siloes to gain insights, spot opportunities and take risks.

Secure OnMesh

Weave security into your digital fabric.

Provides empowerment to develop solutions for innovation and growth.

Permeates the digital ecosystem combining flexibility with impenetrability.

Components

Logicalis SOC

- Global Security Operations Centre
- Continuous monitoring
- 10+ years SOC expertise
- Accredited and upskilling

Logicalis Security services

- Inform cybersecurity strategy
- Fills the security skills gap
- Assist with quick response to risks
- Simplifies complex security landscape

Azure Sentinel

- Analyses data at scale
- Native Microsoft Cloud Integrations
- Connectors for broader security ecosystem tooling
- Orchestration and automation

Cisco SecureX

- Integrates data across ecosystem
- Advanced XDR capabilities
- Optimises process with automation
- Enables simplicity and visibility

Secure OnMesh

Integrates and orchestrates security across the digital ecosystem using a centralised cloud-native platform, so intelligent insights can be automated and actioned – at speed.

- Optimises process with automation
- Enables simplicity and visibility

Logicalis Security Operations Centre

Highly qualified, seasoned cyber response team on hand 24/7 to support your business and mitigate security risks in real time.

Global Security Operations Centre

Continuous monitoring

10+ years SOC expertise

Accredited and upskilling

Logicalis Security Services

Logicalis security experts provide an extensive portfolio of lifecycle security solutions combining strategy and technical excellence to enable your business goals.

Inform cybersecurity strategy

Fill the security skills gap

Assist with quick response to risks

Simplifies complex security landscape

Cisco Secure X

Strengthens security across endpoints, cloud, network, and apps, through orchestration and automation.

Integrates data across ecosystem

Advanced XDR capabilities

Optimises process with automation

Enables simplicity and visibility

Azure Sentinel

Scalable, cloud-native platform that delivers threat intelligence using analytics across your entire digital estate.

Analyses data at scale

Native Microsoft Cloud integrations

Connectors for broader security ecosystem tooling

Orchestration and automation

Gain deeper insights

with more efficiency

Greater insights and control

Gain better security insights across the ecosystem.

Faster incident resolution

Deal with threats faster using automation.

Improved service availability

Predict incidents even before they occur.

Employee empowerment

Allow staff to focus on higher-level tasks.

Turn cybersecurity into a business enabler

Secure IoT

Drive innovation through IoT solutions with a secure and trusted network.

Productive workplace

Support employee productivity with secure, flexible remote working.

Data insights

Use insights to make better security decisions and the best course of action.

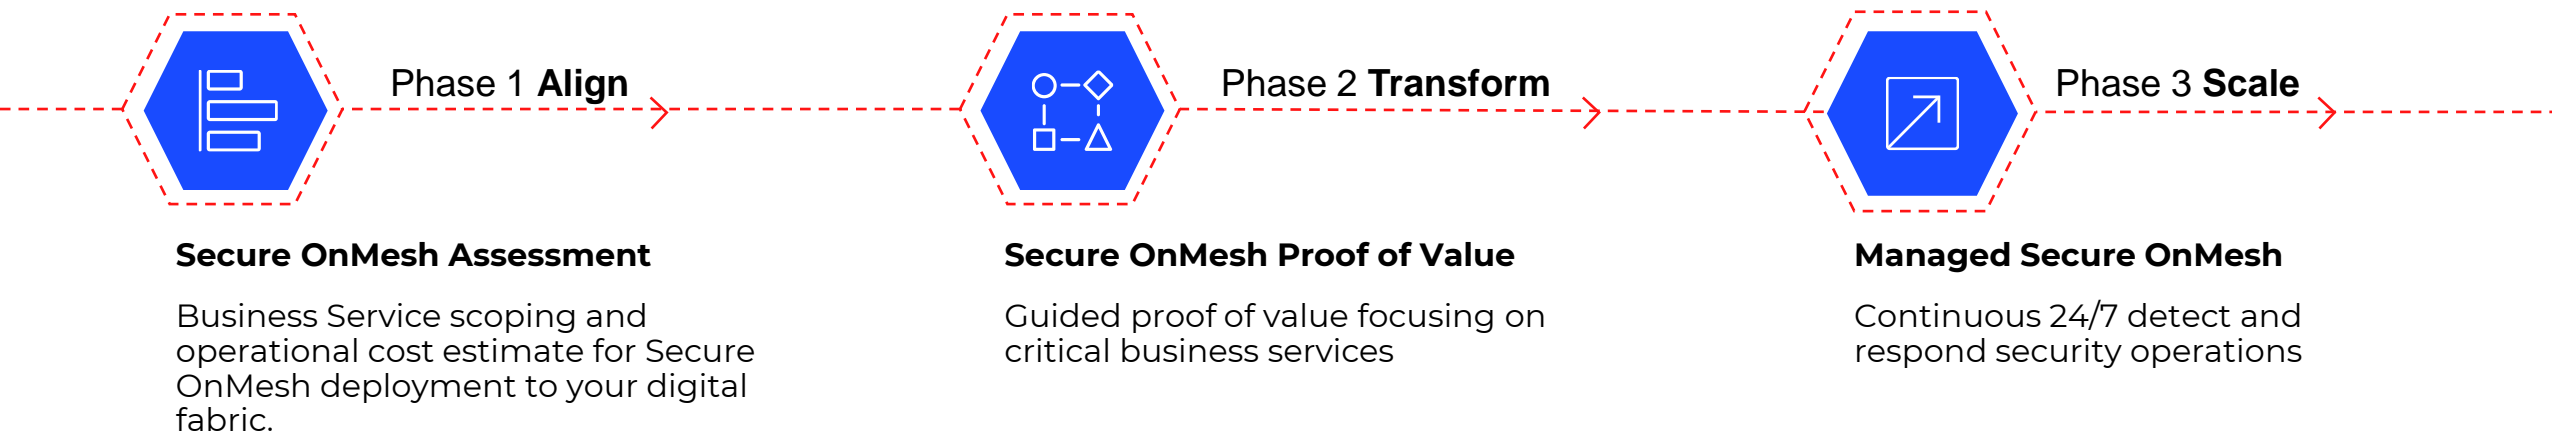

Cloud

Embark upon your cloud journey with confidence and deliver agile solutions.

How we deliver our security solution

Why Logicalis?

Global presence, local execution

We're a leading global MSP, serving 10,000 customers worldwide and with a physical presence in 28 countries.

End-to-end security capabilities

We offer unique consulting capabilities as well as managed services to implement security end-to-end.

Value-driven engagement

Our repeatable model is focused on simplicity, speed and agility to help clients achieve core business value faster and with less risk.

Security expertise

Our global team of security experts have deep domain knowledge across a range of security disciplines

Don't just take
our word for it

Jersey Electricity embedded security across their digital ecosystem to protect all aspects of their operations

To focus on business priorities Jersey Electricity (JE), the largest supplier of electricity in the Channel Islands, needed the confidence that all operations were protected with the latest Systems Security for high availability.

Challenges

- ▶ The legacy SIEM platform had become a business risk and required too much manual work to manage.
- ▶ JE needed to deal with vulnerabilities quickly so they could focus on higher-level tasks for improved business performance.

Approach

- ▶ **Align:** Azure Sentinel was selected as the most suitable platform to migrate to as it aligned with JE's cloud-first strategy.
- ▶ **Transform:** We helped JE migrate to the new modern platform in no longer than three months.
- ▶ **Scale:** Combining our 24x7x365 Jersey based Security Operations Centre with Azure Sentinel delivered an integrated and managed security service that was always on so JE could focus on their core business initiatives.

Results

- ▶ Greater visibility, with automatic level one and two response, with high fidelity logging and information for faster response and meaningful outputs.
- ▶ Delivered a fully managed security service all within a similar budget of the existing platform and with no interruption to the business and more importantly no downtime in their cyber defences.
- ▶ JE had the ability to focus on driving improved operational efficiency and business growth with the confidence knowing their systems were always on and always secure.
