

OneVueX – Advanced Technology for Modern Legal Workplaces

Q2 2021

Market disrupters like the pandemic created massive change in the legal industry impacting operations, client relations and public service. Pressures to control costs, increase efficiencies, and deliver quality legal services have skyrocketed. More **attorneys are working remotely** - video conferencing is used to conduct client meetings, litigations, and mediation. **Courts use technology** to submit court forms, e-file for benefits and court cases, and court appearances, prompting them to move their operations to the cloud. The legal sector was quickly challenged to shift – requiring greater operational agility; major changes in work processes; demand for remote access; and advanced security measures to meet changing client and community needs.

OneVueX Corporation and Microsoft provide legal firms the technology and innovation they need, creating personalized, dynamic digital offerings their clients seek. OneVueX Unified Systems makes it easy to achieve digital strategies with more complete business outcomes, delivering advanced computing power that is easy to use, customizable, adaptable to change, and secure, with less IT maintenance and operational expense.

OneVueX Unified Systems– Preparing the Legal Sector for the Digital Workplace

OneVueX is a digital workplace platform that intelligently integrates data, content, insights, and technology solutions employees use every day (on-premises to cloud), displaying combined results through a single familiar interface. OneVueX provides everything needed to create, find, analyze, and share all sources of information and workflows with advanced security and controlled access. Experience more productive teams, more informed, confident decisions and legal systems that are adaptable to change, with advanced security that protects information sources wherever they reside.

OneVueX Unified Systems makes it easier to **outperform, outthink, and out innovate**, so market disruptions are an opportunity, not a threat.

Integrate information – on-premises to cloud

Turn search to an ask, finding info in all connected systems

Expand client engagement with secure remote access

Ensure employees, clients and systems are secure

What Your Business Can Achieve with OneVue^x

OneVue^x Unified Systems seamlessly integrates most computing solutions with flexibility to easily customize systems to meet your specific needs. OneVue^x Unified Systems expands the capabilities of your existing technology to another level by integrating new innovations, while eliminating older, more costly systems.

Picture this

Innovation is difficult and staying productive is a challenge if you cannot find, access, relate or share needed information.

It is hard connecting with others and gaining insights on projects, or the organization is challenging.

You struggle with safety and security in apps, platforms, devices, and the organization.

With OneVue^x Unified Systems and Microsoft Solutions

Achieve customized solutions, enterprise search, and collaboration:

- **Achieve innovative ideas and better results** with integrated apps, platforms, and systems like O365/M365, SQL, IBM, Oracle, Salesforce, etc., specific to your needs.
- **Experience new possibilities and new ways to innovate**, accessing, sharing, and working with information in all connected solutions (Microsoft and non-Microsoft) – on-premises to cloud.
- **Stop searching, just ask OneVue^x Unified Systems** to find all related information using AI that eliminates the need to remember filenames or their location.
- **Witness at least 40% greater productivity** with teams that collaborate across multiple environments, generating greater, more confident results.

Gain greater vision working anywhere on any device:

- **Work fluently across systems**, accessing all connected solutions from a single familiar interface and one log-in.
- **Stay connected to teams regardless of location** with an integrated view of systems, emails, shared calendars, and contacts synced across devices in real-time.
- **Achieve greater insights and transparency** with a complete view of the organization, with dashboards and BI reports built right in.
- **Experience greater productivity** with **Digital Subject Cards** and **automated Topic Pages** that connect multiple sources of information for faster accessibility.

Ensure the entire organization is protected:

- **Work safely**, managing cases on most devices, assured that information in all environments is protected, on-premises to cloud.
- **Experience unmatched security** with Microsoft 365 and Azure security extended from the cloud to on-premises, legacy systems.
- **Protect all connected systems and devices** from intrusion, malware, ransomware, and viruses.
- **Monitor devices and people for added safety** with multiple layers of security, meeting all compliance standards.
