

OneVuex Unified Systems

A Unified Interface for Modern Government

Empowering The Legal Industry for the Future

Recent market disrupters exposed government inefficiencies, including outdated legacy systems, on-premises networks, siloed agencies, and security vulnerabilities. Government agencies were quickly challenged to shift – requiring greater operational agility; major changes in work processes; demand for remote access and collaboration; and advanced security to address major cyberthreats.

Modernization is critical but advanced technology, integrated systems, cloud-based solutions, and advanced security come at a cost.

Unified Software, Platforms and Systems

OneVue^x integrates technology used every day with greater connectivity and functionality, eliminating barriers between systems, so users are more productive, achieving faster, more confident business insights and results.

OneVue^x + Microsoft Solutions

OneVue^x integrates Microsoft and other vendor technologies through a single familiar interface, optimizing processes, organizational intelligence and security while minimizing IT maintenance.

Expected Business Results

Achieve greater results, IT cost savings and up to 40% improved productivity. Self-empowered legal teams find, access, combine, share, and analyze information wherever it resides, with mobility and advanced cloud security.

OneVuex Integrates Microsoft and Other Technologies for Greater Adaptation

OneVuex Unified Systems One System, One Familiar Interface

OneVuex is a digital workplace platform that intelligently integrates Microsoft and other applications and platforms (on-premises to cloud), displaying combined results through a single familiar interface.

With OneVuex, **integrate, create, find, analyze, and share** all sources of information and workflows with **advanced security** and **controlled access** for more productive workplaces.

Hyper-Jump to the Next Level of Innovation

OneVue^x advances Microsoft solutions, integrating content, data, and **functionality** with non-Microsoft apps and platforms, creating technology greater than the sum of its parts.

Examples of Advanced Functionality:

OneVue^x runs the code of all connected solutions as a singular code – constantly innovating as new technology is introduced and integrated

Searches in SharePoint retrieve M365 files, AND media, live emails (without opening Outlook), and data in other platforms like SQL Server

OneVue^x searches across systems with Bing, retrieving internet results AND folders, files, emails, data, media, and Teams meetings specific to the request and user without recalling filenames

Using Microsoft AI, OneVue^x creates Digital Subject Management Cards, organizing related information so all sources of content are accessible in a single record

With permissions, data in Platforms like SQL, Salesforce, and Oracle can be accessed, managed, edited, and shared in OneVue^x, reflecting changes at the source

Information in Platforms like SQL, Salesforce, and Oracle can be related/connected to M365 files, Power BI data, and other information

OneVue^x “instructs” Microsoft security to recognize non-Microsoft technology, extending protection to all connected solutions

OneVue^x securely shares libraries, folders, or files external to the organization, collaborating as an extended team

Information in on-premises and legacy systems is accessible via mobile devices

The Future is Now With OneVue^x

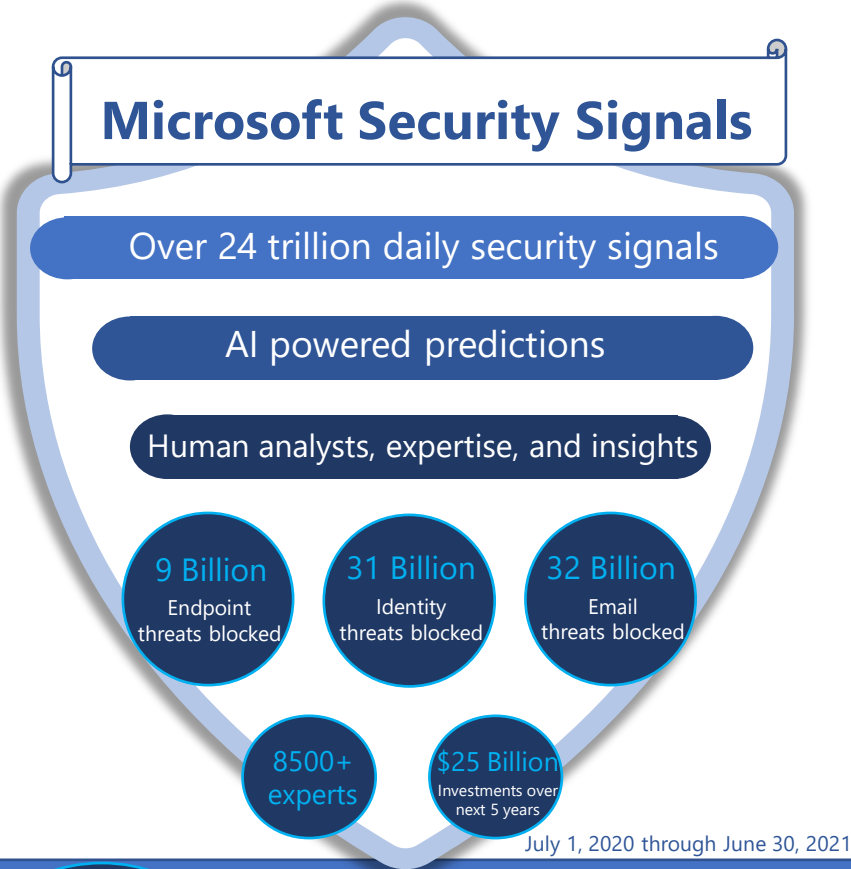

OneVuex and Microsoft – Advanced Security for the Modern Workplace

OneVuex and Microsoft take computing and security to the next level protecting your business from today’s sophisticated threats

OneVuex seamlessly integrates Microsoft business and security solutions across all connected applications, platforms and systems (Microsoft and non-Microsoft), delivering true system integration, greater productivity, and the most advanced security on the planet.

Microsoft serves billions of customers globally, aggregating security data from a broad and diverse spectrum of companies, organizations, and consumers. With a global team of thousands of security professionals and cutting-edge artificial intelligence, processing trillions of raw security signals daily, billions of complex predictions and millions of automated actions are generated to protect customers and make the internet a safer place.

This is the OneVuex – Microsoft difference.

OneVuex Advanced System Security

OneVuex provides the most advanced security integrating and extending Microsoft Security to non-Microsoft solutions, on-premises to cloud.

Integrated Microsoft Threat Protection Products	
Microsoft Azure Sentinel	See and stop threats before they cause harm, with our cloud native SIEM that aggregates logs from all company sources (OS, application, antivirus, database, or server logs), analyzing large quantities of data, searching for anomalies and threats - smarter and faster with AI. Eliminate security infrastructure setup and maintenance, and elastically scale to meet security needs—while reducing costs as much as 48 percent compared to traditional SIEMs.
Microsoft 365 Defender	Prevent, detect, investigate, and remediate attacks across your identities, endpoints, apps, email, data, and cloud apps with full XDR capabilities. Investigate and respond to attacks with out-of-the-box, best-in-class protection. Hunt for threats and easily coordinate your response from a single dashboard.
	
Microsoft 365 Defender for Cloud (formerly Azure Security Center and Azure Defender)	Protect your multi-cloud and hybrid cloud workloads with built-in XDR capabilities. Secure your servers, databases, storage, containers, and IoT devices. Focus on what matters most with prioritized alerts.

OneVuex and Microsoft – Your Line of Defense In Today's Market

The cybersecurity bell curve:

Basic security hygiene still protects against 98% of attacks

Enable multifactor authentication

Make it harder for bad actors to utilize stolen or phished credentials by enabling multifactor authentication. Always authenticate and authorize based on all available data points, including user identity, location, device health, service or workload, data classification, and anomalies.

Apply least privilege access

Prevent attackers from spreading across the network by applying least privilege access principles, which limits user access with just-in-time and just-enough-access (JIT/JEA), risk-based adaptive policies, and data protection to help secure both data and productivity.

Keep up to date

Mitigate the risk of software vulnerabilities by ensuring your organization's devices, infrastructure, and applications are kept up to date and correctly configured. Endpoint management solutions allow policies to be pushed to machines for correct configuration and ensure systems are running the latest versions.

Utilize antimalware

Stop malware attacks from executing by installing and enabling antimalware solutions on endpoints and devices. Utilize cloud-connected antimalware services for the most current and accurate detection capabilities.

Protect data

Know where your sensitive data is stored and who has access. Implement information protection best practices such as applying sensitivity labels and data loss prevention policies. If a breach does occur, it's critical that security teams know where the most sensitive data is stored and accessed.

OneVuex – New Age of IT

OneVuex and Windows 365 provide more **powerful computing** with **less complexity**, **eliminating out-of-control costs** associated with the **management, upkeep and uncertainty** of **outdated IT**.

Now networks are designed with a push of a button, deployed throughout the entire organization. **IT infrastructure is standardized, reducing** the need for **IT specialists** and **outdated skill sets**.

IT is free to **focus on innovation**, instead of managing and repairing obsolete systems.

Experience **dramatic cost reductions** and **control your IT budget** to focus on **improving productivity and your ROI**.

OneVuex Premier Support

The most comprehensive customer and technical support offering

With OneVuex Premier Support we're with you every step of the way.

OneVuex and Microsoft provide the most comprehensive support plan to ensure your success as you transform to the Modern Workplace. We start with a customized digital transformation roadmap specific to your business. If any issues arise, Microsoft Engineers provide expedited services. To support your team, we offer comprehensive training, and we help you plan for future innovations.

Here's what you can expect:

Customized Digital Transformation Plan

- ✓ OneVuex and Microsoft Premier Engineers for planning, implementation, deployment, migration, optimization, and maintenance
- ✓ Microsoft Security Risk Detection
- ✓ Workload Optimizations
- ✓ Design Assessments
- ✓ Technical Implementation Assistance

Customer and Technical Support

- ✓ Designated Microsoft Support Engineering
- ✓ Priority Queue Access to Microsoft Support Engineers
- ✓ 24-7 Break-fix Support for OneVuex and Microsoft Cloud, Hybrid and On-premises Solutions and Services

Optimization Plan

- ✓ Proactive Service Communications to identify service issues and minimize disruptions
- ✓ Access to best practices, reference architectures, and additional resources to envision new solutions
- ✓ On-line | On Demand Training

As digital transformation accelerates, you must innovate faster and be more agile in today's competitive marketplace.

Leveraging the best, flexible customer and technical support plan and personalized services is paramount to making the most of your technology investments. That's what **OneVuex Premier Support and Microsoft deliver.**

OneVue^x's Value to Customers

Dan Bates

President, Greater Hamilton Chamber of Commerce

4 years using OneVue^x

Productivity

OneVue^x created tremendous efficiencies. We can access, find and share information within the team and externally with our board and members. We were able to outsource our finance position, gaining greater expertise at a lower cost. OneVue^x creates a secure interface to the financial group so we can work together as if they were in our office. We collaborate, share information, submit receipts, view accounting files, review income and expenses. We connect information from Chamber Master (membership database), QuickBooks, excel spreadsheets, through a customized, easy to read dashboard getting up to the second insights on our performance – anywhere, anytime.

Mobility

I work with businesses in the field. I use my cell phone a lot and with OneVue^x, I can conduct business just as easily as if I were in the office. I can access and find all my information in our databases, files, emails, etc. I can even set up quick video conferences wherever I may be. When COVID hit, it didn't impact our operations, strategy or workflow for a single day. With OneVue^x, we have tremendous power and can be a truly mobile workforce.

Security

We have sensitive member and board information and share confidential documents. With OneVue^x all our documents, data and emails are protected. We can share information through the system, without sending attachments or paper documents. With OneVue^x, I don't worry about hackers, invasion, or safeguarding our data and confidential information.

Cost Savings

Noticeable improvements came fast. With the old system, an IT rep was fixing something twice a month at an additional cost of ~\$150 per visit – over an above our contract. Eliminating this, we saved 7% in our budget. We also eliminated charges for storage, security, file sharing, maintaining and fixing equipment. We weren't losing information anymore and I could eliminate the budget line for unexpected IT expenses. OneVue^x works, the cost is predictable and there's no additional charges for assistance.
