

# OneVuex – Advanced Technology for Modern Government Workplaces

Digital transformation, innovation and growth enables government agencies to better engage with citizens, empower employees, optimize operations, and reinvent government services and business models with flexible, integrated, and trustworthy solutions. As the global pandemic exposed inefficiencies of outdated legacy systems, on-premises networks, siloed agencies, and security vulnerabilities, the need for change accelerated. Government's demand for solutions offering greater operational agility; major improvements in work processes; remote access and collaboration; advanced security measures; and multi-cloud and on-premises integration became a top priority to improve public services and provide sustainable programs and responsive solutions. But achieving innovation with the agility and adaptability needed can be complex, confusing, and expensive.

**OneVuex Unified Systems and Microsoft Solutions** provide government organizations the technology and innovation they need to achieve more efficient, cost-effective digital transformation by delivering advanced computing power that is easy to use, customizable, adaptable to change, and secure, with less IT maintenance and expense. With OneVuex Unified Systems, it's easy to integrate systems, expand operations, and replace outdated technology with solutions that meet the needs of today's Modern Workplace.

## OneVuex – Preparing Government Agencies for the Modern Workplace

OneVuex is a digital workplace platform that intelligently integrates data, content, insights, and technology solutions employees use every day (on-premises to cloud), displaying combined results through a single familiar interface. OneVuex provides everything needed to create, find, analyze, and share all sources of information and workflows with advanced security and controlled access. Experience up to 40% more productive teams, reduce IT expenses, and achieve adaptable, flexible systems, with advanced security that protects information wherever it resides.

**OneVuex reduces the complexity and expense of digital transformation, so market disruptions become an opportunity, not a threat.**

Integrate solutions – on-premises to cloud

Turn search to an ask, finding info in all connected systems

Connect to people and information from any location

Securely access, share, and protect sensitive information

# What Government Agencies Can Achieve with OneVuex

OneVuex Unified Systems seamlessly integrates most computing solutions with flexibility to easily customize systems to meet your specific needs, expanding capabilities of your existing technology, taking it to another level by integrating new innovations, while eliminating older, more costly systems.

## Picture this

Innovation is difficult and staying productive is a challenge if you cannot find, access, relate or share needed information.

It is difficult connecting with others and gaining insights on projects or the organization.

Maintaining safety and security across disparate apps, platforms, devices, and systems is challenging.

## With OneVuex Unified Systems and Microsoft Solutions

### Achieve customized solutions, enterprise search, and collaboration:

- **Achieve innovative ideas and better results** with integrated apps, platforms, and systems like O365/M365, SQL, IBM, Oracle, Salesforce, specific to your agency's needs.
- **Experience new possibilities and innovations**, accessing and sharing information in all connected solutions (Microsoft and non-Microsoft) – on-premises to cloud.
- **Stop searching, just ask OneVuex** to find all related information with AI that eliminates the need to remember filenames or their location.
- **Witness at least 40% greater productivity** with teams that collaborate across multiple environments, generating greater, more confident results.

### Gain greater vision working anywhere on any device:

- **Work fluently across systems**, accessing all connected solutions from a single familiar interface and one log-in.
- **Stay connected to teams regardless of location** with an integrated view of systems, emails, shared calendars, and contacts synced across devices in real-time.
- **Achieve greater insights and transparency** with a complete view of the organization, with dashboards and BI reports built right in.
- **Experience greater productivity** with **Digital Subject Cards** and **automated Topic Pages** that connect related sources of information for faster accessibility.

### Ensure the entire organization is protected:

- **Work safely**, managing projects on most devices, assured that information in all environments is protected, on-premises to cloud.
- **Experience unmatched security** with Microsoft 365 and Azure security extended from the cloud to on-premises, legacy systems.
- **Protect all connected systems and devices** from intrusion, malware, ransomware, and viruses.
- **Monitor devices and people for added safety** with multiple layers of security, meeting all compliance standards.
