Compliant Data Interoperability for Healthcare using Azure FHIR

What we do:
1. Understand Customer Ecosystem
2. Identification of use cases followed by prioritization of these use cases
3. Identification of the fit for purpose options for FHIR from Microsoft (3 configurations available) -
   1. Azure Health Data Services (PaaS Platform) consisting of FHIR Service, DICOM Service, MedTech Service, Unstructured data (Clinical notes or Health documents)
   2. Azure API for FHIR
   3. FHIR Server for Azure
4. PoC Development (1 Use Case) -
   1. Translation of HL7v2, CDA, JSON, or CSV formats to FHIR R4
   2. Process Visualization (based on Power Platform)
5. Evangelization and Manifestation of outcome of PoC highlighting the benefits of FHIR to your organization
