

# OneVuex Unified Systems

A Unified Approach to Digital Transformation and Cloud Migration

# Benefits of Cloud Migration

The benefits of moving to the cloud have been proven over, and over again.

## Security

**4.2B**

records stolen by hackers in 2016

**30%**

of organizations **lose revenue** during an attack

## New Cybersecurity

regulations like GDPR, Pci, Sarbanes – Oxley, and CMMC requiring greater oversight

## Cost Savings

**80%**

reduction of IT administration time spent on patching, network setup, and firewall configuration<sup>2</sup>

**\$360B**

can be saved in 15 years with just \$6M spent on infrastructure preparedness<sup>1</sup>

**1.1B**

Hours annually can be saved with AI and automation<sup>3</sup>

## Innovation + Growth

**50%**

improved app delivery time. Websites are running in minutes. Not waiting for servers.

**\$100M**

additional operating income experienced by organizations that harness AI, the cloud, and data<sup>4</sup>

collection and analysis capabilities

# Market Disruption Demands High Tech Solutions

**OneVuex** is a digital platform that intelligently integrates Microsoft and other applications and platforms (on-premises to cloud), displaying combined results through a single familiar interface.

## Lower your risks and costs with OneVuex and Microsoft Solutions

### Unified Software, Platforms and Systems

OneVuex integrates technology used every day with greater connectivity and functionality, eliminating barriers between systems, so users are more productive, achieving faster, more confident business insights and results.

### OneVuex + Microsoft Solutions

OneVuex integrates Microsoft and other vendor technologies through a single familiar interface, optimizing processes, organizational intelligence and security while minimizing IT maintenance.

### Expected Business Results

Achieve greater results, IT cost savings and up to 40% improved productivity. Self-empowered workforces find, access, combine, share, and analyze information wherever it resides, with mobility and advanced cloud security.

# OneVuex – Makes it Easy for Users to Move to the Cloud

Now, the question is no longer why to make the move – but how do we get there?

OneVuex's Code Integration Technology quickly connects all your information wherever it resides (on-premises to cloud), so migration is quick and easy.

**Drag 'n Drop** – Users can easily drag and drop files and folders from their desktop or file explorer. OneVuex quickly replicates a copy in your OneVuex Library with no disruption to your workflows.

# OneVuex – Your Organization’s Launchpad to Cloud Migration

For organizations with larger systems and workloads, take advantage of OneVuex migration services – going at your own pace.

**Discover** – Working with Microsoft, we employ a team of IT asset managers, software licensing experts, system administrators and cloud engineers to analyze your organization to customize and optimize your plan, helping you understand everything you need to know about your on-premises environment.

**Assess** – We provide Server Optimization, Modern Workplace (M365), and Cybersecurity Assessments; Software Vendor Risk Analysis; and Compliance and Software Licensing Inventory to customize and optimize your plan.

**Migrate** – We migrate and modernize your workloads using a comprehensive approach for your application and datacenter estate. Get support for key migration workloads like Windows, SQL, and Linux Server, databases, data, web apps, and virtual desktops. Using Microsoft FastTrack we also migrate your email and file data in source environments to M365.

# OneVuex Advanced System Security

OneVuex provides the most advanced security integrating and extending Microsoft Security to non-Microsoft solutions, on-premises to cloud.

## OneVuex Security Provides

**Multiple Security Layers,**  
MFA, SSO Cloud, Secure  
Device Sign-on

**Integrates security systems  
and tracks devices**

**Email and Communication  
Encryption**

**Extends Security from cloud to  
on-premises and legacy systems**

**Entire System Replication,  
not unreliable backup**

# OneVuex – Reduce Your Computing Costs by 40+%

OneVuex reduces your IT maintenance and expenses and removes the complexities out of migration. You get and pay for the computing power you need – nothing more, nothing less.

We help you calculate your cost savings, and automatically apply insights from your assessment to your migration to help you make the most of your investment.
