

**Logicalis Production Ready Hybrid Cloud**

# Hybrid cloud transformation that delivers business value at speed.

In a fast-changing technology landscape, migrating workloads and managing a secure hybrid platform can be complex and cumbersome. The transition to a hybrid model places a lot of strain on internal resources and often exposes gaps in expertise.

## **Logicalis Production Ready Hybrid Cloud**

helps you transform your business with a scalable and secure hybrid cloud platform extending Azure services and workloads on-premises, modernising existing workloads, and maintaining mission-critical legacy systems with an Azure-integrated platform using Azure Stack HCI, delivered in a fast, cost effective and controlled way. Our proven approach delivers value at speed, with low risk, so you know you'll get it right – the first time – in record time.

 **LOGICALIS**  
Architects of Change

# A tried and tested framework to help you achieve your vision.

Setup and manage your Azure cloud with integrated Azure Stack HCI for hybrid management and operations across your enterprise, at speed in a controlled and compliant way while minimising cost. Through our three-step approach, complemented by our expertise and best-in-class technology, we help you to both strategically plan and execute on your hybrid strategy.

- Azure hybrid by design with Azure Hybrid Services
- Natively integrate with Azure
- Enterprise scale
- Maintain mission-critical legacy system
- Unified management and operations
- Deployment flexibility - Select the deployment scenario that's best for your workload
- Accelerate innovation
- Future-proofed architecture with cloud and HCI

## How we can help

Logicalis can help accelerate the adoption of hybrid cloud. Azure Stack HCI is part of the Logicalis Production Ready Hybrid Cloud platform providing the flexibility to meet hybrid cloud needs and achieve enterprise scale.

### Step 1: Align

#### Readiness assessment

Hybrid strategy roadmap, discovery and assessment, and workload transformation plan with highly accurate cost expectations.

#### Security assessment

Detailed considerations around security, network, governance and application architecture.

### Step 2: Transform

#### Platform implementation

Deployment of a standardised best-practice platform using a proven approach that reduces time to value.

#### Workload migration

Low-risk, accelerated cloud adoption and migration efforts using uniform deployments and configuration.

### Step 3: Scale

#### Managed services

Services to manage cloud performance, optimise cost and ensure governance and security.

#### Ongoing innovation

Continually modernise and innovate throughout the business lifecycle for long term growth.

# Our proven methodology and value-driven approach is what sets us apart.

Leverage our years of experience in on-premises data centers, and cloud migrations with an Azure Expert MSP audit-approved framework

## Global presence, local execution

With a physical presence in 25 countries and experience working with global customers, we're a #1 MSP in the mid-market sector, serving 10,000 customers worldwide.

## End-to-end capabilities

We have unique consulting capabilities as well as managed services for implementing and running cloud solutions, and managing the customer lifecycle.

## Value-driven engagements

Occupying a space between GSIs, local specialist SIs and service providers, means our repeatable model is focused on simplicity, speed and agility to help clients achieve value faster, with less risk.

## Industry specialists

Our network of 6,500 employees has strong expertise in architecting change in financial services, banking, healthcare, government, manufacturing and more.

# We're in the top 1% of Microsoft Azure partners globally.

As an Azure Expert Managed Services Provider we help our clients maximise the benefits that can be achieved from Azure.

## Our managed services expertise allows us to:

- ▶ Accelerate business growth using infinite compute capacity.
- ▶ Leverage the full potential of new and innovative features offered by Azure.
- ▶ Ensure that your platform and ecosystem is as secure as it possibly can be.
- ▶ Align your cloud strategy with your business strategy and objectives.

## Stay ahead of change with a hybrid cloud platform that delivers value at speed.

Get in touch to find out how our team of experts can help you build a secure, flexible modern hybrid cloud platform at speed and low risk, with our reliable framework and tested methodology.
