

# Modern Data Platform - Assessment and Implementation Roadmap

**TRUENORTH**  
  
**GROUP**

# Objective

To have a 1-day workshop with the client and evaluate the client's cloud and data analytics requirements and showcasing the value of Azure Synapse. Providing feedback, inputs and solutions to their obstacles, in order to assist in their digital journey.

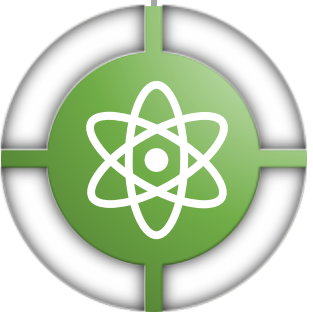

# Client Value Proposition

- Free assessment of the client's digital needs, focusing on cloud and data analytics
- Identifying opportunities that drive operational efficiencies, revenue identification and business model optimizations
- Tangible and value-added outcomes from the session
- Provide a roadmap outlining the high-level architecture and cloud technologies and functionalities

# Schematic Flow

## Strategy

1-Day Workshop with the client to define their strategy and needs for analytics.

## Discovery

- Define the business use case for the BI Dashboard
- Identify insights to be visualized
- ID data sources and explore data availability and completeness

## Data Preparation

- Acquire and ingest data to Azure Data Lake for data prep
- ETL data Cleanse and prepare the data for modelling

## Modelling & Prototype

- Create appropriate data model to achieve right insights
- Design dashboard prototype for visualizing the insights and review with business stakeholders

## Dashboard Delivery

- Design, develop and quality checks dashboard.
- Review dashboard with business stakeholders and deliver the complete solution

- Digital Roadmap
- Maturity Assessment
- Indicative Pricing

1 day

- Business Requirement Doc (BRD) for the prototype (highlighting success factors)

4 days

- Prepared datasets and data pipeline

3 days

- Data model diagram and dashboard mock-up

4 days

- Completed BI dashboard and setup documentation

3 days
