redeploy

Specialists in Microsoft Azure

Our AKS (Azure Kubernetes Service) starter pack allows you to innovate with Kubernetes on Azure, and achieve the agility, reliability, and scalability that is demanded by the next generation of applications.

This starter pack is your opportunity to unite teams on a single platform to build and scale apps with confidence, creativity, and clarity.

We hope you seize it.

This project includes:

- ☑ Educational workshop

- ☑ Introduction to AKS and Kubernetes

- ☑ Governance and Deployment

- ☑ Customized solutions

- ☑ Next-gen development and operations of apps

- ☑ Subscription-based design and access

- ☑ Post-completion evaluation of the project

Project roadmap:

1. (Free)

Educational Workshop 1-2h

We use an educational workshop, free of charge, to provide you with an introduction to AKS and Kubernetes and share insights on the next generation of applications and operations.

2. (Fixed price or sponsored*)

Scope of Work Planning

We map out the work ahead, which will include examples of customized solutions, guidance for project management, a timeline, deliverables, and project-specific activities.
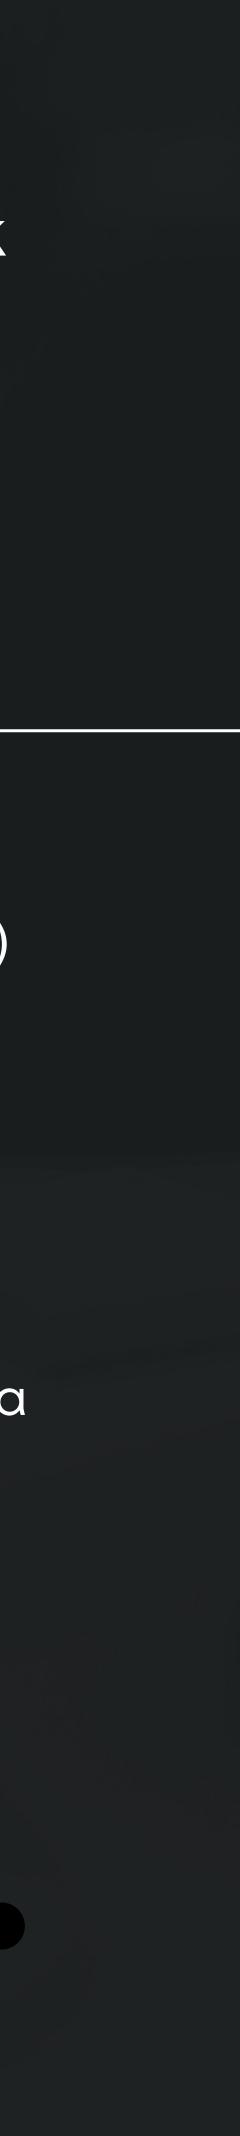

3. (Fixed price or sponsored*)

The Starter Pack Delivery

We deliver according to the pre-determined scope of work, which will include all requirements, requests, and agreed-upon goals.

4. (Fixed price or sponsored*)

Final Assessment & Evaluation

Upon final completion of the project, we provide you with a detailed assessment and evaluation.

*Sponsored by the **Azure Migration and Modernization Program from Microsoft**

redeploy

Specialists in Microsoft Azure

"When we needed help moving our services to Azure, it was obvious to choose a company with a niched specialty on Azure. The choice fell on Redeploy, which we haven't regretted since!

- Lars Bogren, CIO at Warner Bros
