POWER BI ADVANCED DATA MODELING: ONE-DAY WORKSHOP

Learn how to use Power BI to import and shape data from multiple sources and walk through its various capabilities that you can use to enhance the data model for your business users with the Power BI Advanced Data Modeling workshop.

This course will teach you key aspects of how to create a great data model to meet your business needs, demonstrate features for enhancing data models so you can build excellent reports, and provide an introduction to Data Analysis Expressions (DAX) to create calculations.

DELIVERABLES

After completing this training, attendees will be able to import data from a variety of sources, shape it, create the data model, and write DAX functions to the Power BI model.

Additionally, Impact will provide a certification to all attendees, along with files, reports, and dashboards generated throughout the sessions.
