DotModus is a technology consultancy specialising in **machine learning**, **data analytics**, and **software development** in the cloud.

We use a combination of these technologies to help businesses improve efficiency, productivity and decision making.

Our **workshops** are comprehensive, informative and relevant. Each workshop is hosted by a diverse team of cloud certified engineers and experts, adhering to the latest industry best practices.

Each **technology solution** has been fine-tuned to be rapidly deployed for the shortest time to value, without disrupting your existing IT landscape.

AZURE IN A MONTH

1 MONTH IMPLEMENTATION

Your cloud migration to Azure starts here. Move your data and applications to Azure in a month or less.

Whether you need to reduce on-premises data centers, migrate workloads, modernise apps or leave another cloud, we'll work to craft the right cloud migration solution that provides the most value for you and your business.

We'll work to develop and execute a cloud migration that is aligned with global best practices, meets all data security requirements and satisfies the specific needs of your business.

Features

No interruption to business
Move to cloud without downtime, loss of service or a disruption to business operations.

Cost-conscious
Transparent, cost-effective cloud environments. Environments that auto-scale and adapt to usage to ensure that you only pay for the cloud services you need.

Built to last
Get a cloud environment that adjusts to the changing needs of your business. Our solutions automatically scale and adapt to future traffic or storage requirements.

Extensive support
The performance of your cloud environment is closely monitored by our support teams to ensure maximum efficiency and connectivity.

DATA ANALYTICS WITH AZURE

3 DAY WORKSHOP

In this interactive 3 day workshop, we'll step you through the various data analytics tools available to you on the Azure platform.

We'll show you how each of these services fit together, and how your team can use them for unparalleled data analysis.

We'll use real-world examples to illustrate common problems that businesses are tackling with Azure analytics and ensure your team is ready to promote a data-driven culture throughout your business.

Outcomes

- Learn about the various data analytics tools available to you on the Microsoft Azure platform.

- Learn how to create an analytics pipeline that goes from ingestion to insights

- Enable a truly data-driven culture in your business and empower self-service analytics

- Learn how to keep your data safe and compliant

- Learn how to reduce your spend and better manage resource usage

OPTIMISE YOUR AZURE SPEND

1 WEEK ASSESSMENT

Measuring and understanding the complete cost of your cloud environment is essential to running a modern business. Our 1-week cloud assessment will make sure you're getting the most out of your Azure environment.

Our assessment team will break down your costs to see where you may be overspending on licenses, users, CPU or storage and give you a detailed list of suggested cost-saving adjustments.

Outcomes

- A detailed inventory of your existing virtual servers and databases running in the cloud or on-prem

- A breakdown of the costs of running your current environment and where you might be overspending.

- A customised report on the total potential savings

- A detailed list of suggested cost-saving adjustments you could make to your cloud environment

- Guidance to help you execute our suggested changes

Certified Cloud Team

We have a team of 135 developers, data engineers, and IT professionals. Our senior engineers are certified across various Microsoft Azure disciplines. Each certification is a trusted stamp of approval that validates an individual's expertise and ability to professionally understand, implement and support a given cloud solution or product.

Extensive Experience Across All Industries

For over 10 years we have been the chosen partner for cloud technology and data analytics to many of the biggest global and South African brands.

# Industry-Leading Core Capabilities

End-to-end solutions across all primary software development and data engineering disciplines.

Machine Learning and AI

Data Engineering and Analytics

Cloud Infrastructure and Security
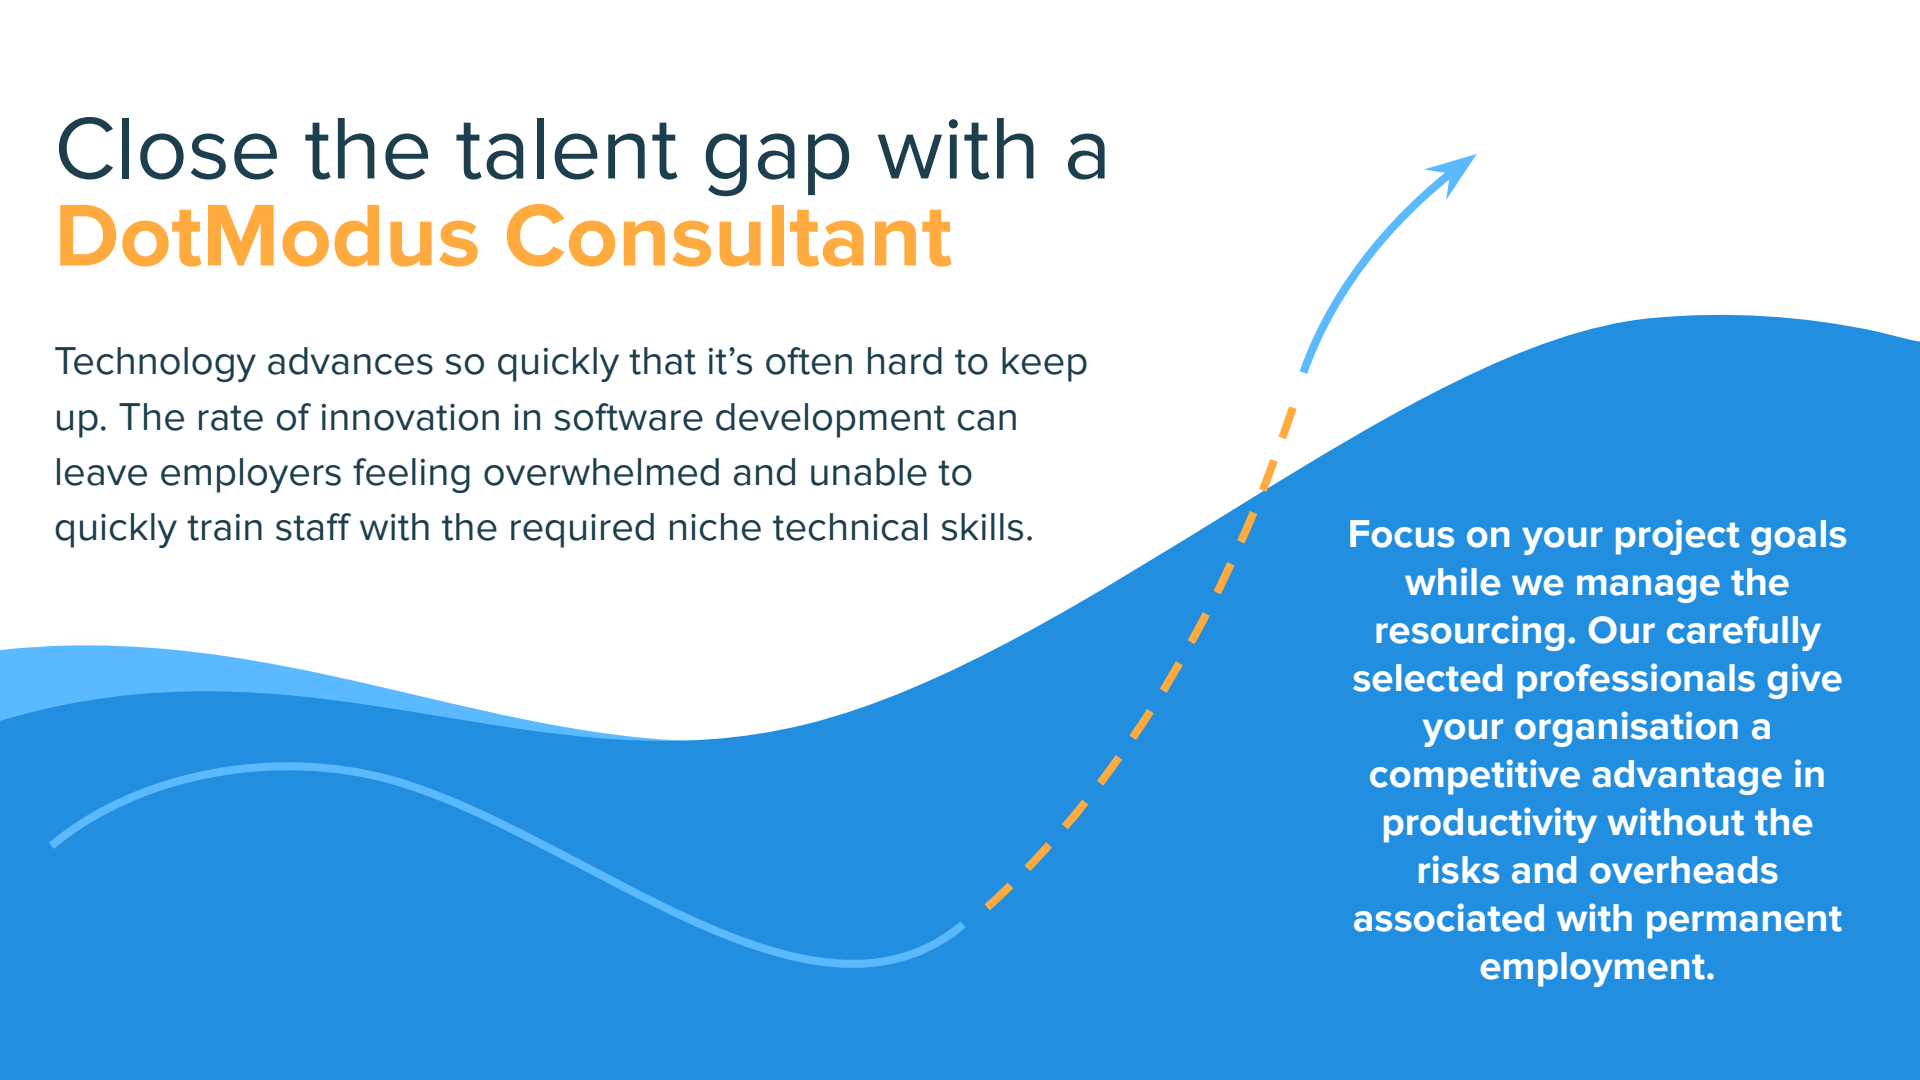

Web and Mobile App Development

Close the talent gap with a DotModus Consultant

Technology advances so quickly that it's often hard to keep up. The rate of innovation in software development can leave employers feeling overwhelmed and unable to quickly train staff with the required niche technical skills.

Focus on your project goals while we manage the resourcing. Our carefully selected professionals give your organisation a competitive advantage in productivity without the risks and overheads associated with permanent employment.
