

# Pitch Deck

## BIMANU

### - BUSINESS INTELLIGENCE MANUFACTURING -

**We are the red carpet for AI\***

# INITIAL SITUATION IN COMPANIES

Bet you have multiple systems and data in use in your company

Spreadsheets

CRM Software

EPR &  
Accounting  
Software

Many  
databases

Industry 4.0

there can be  
more 😊

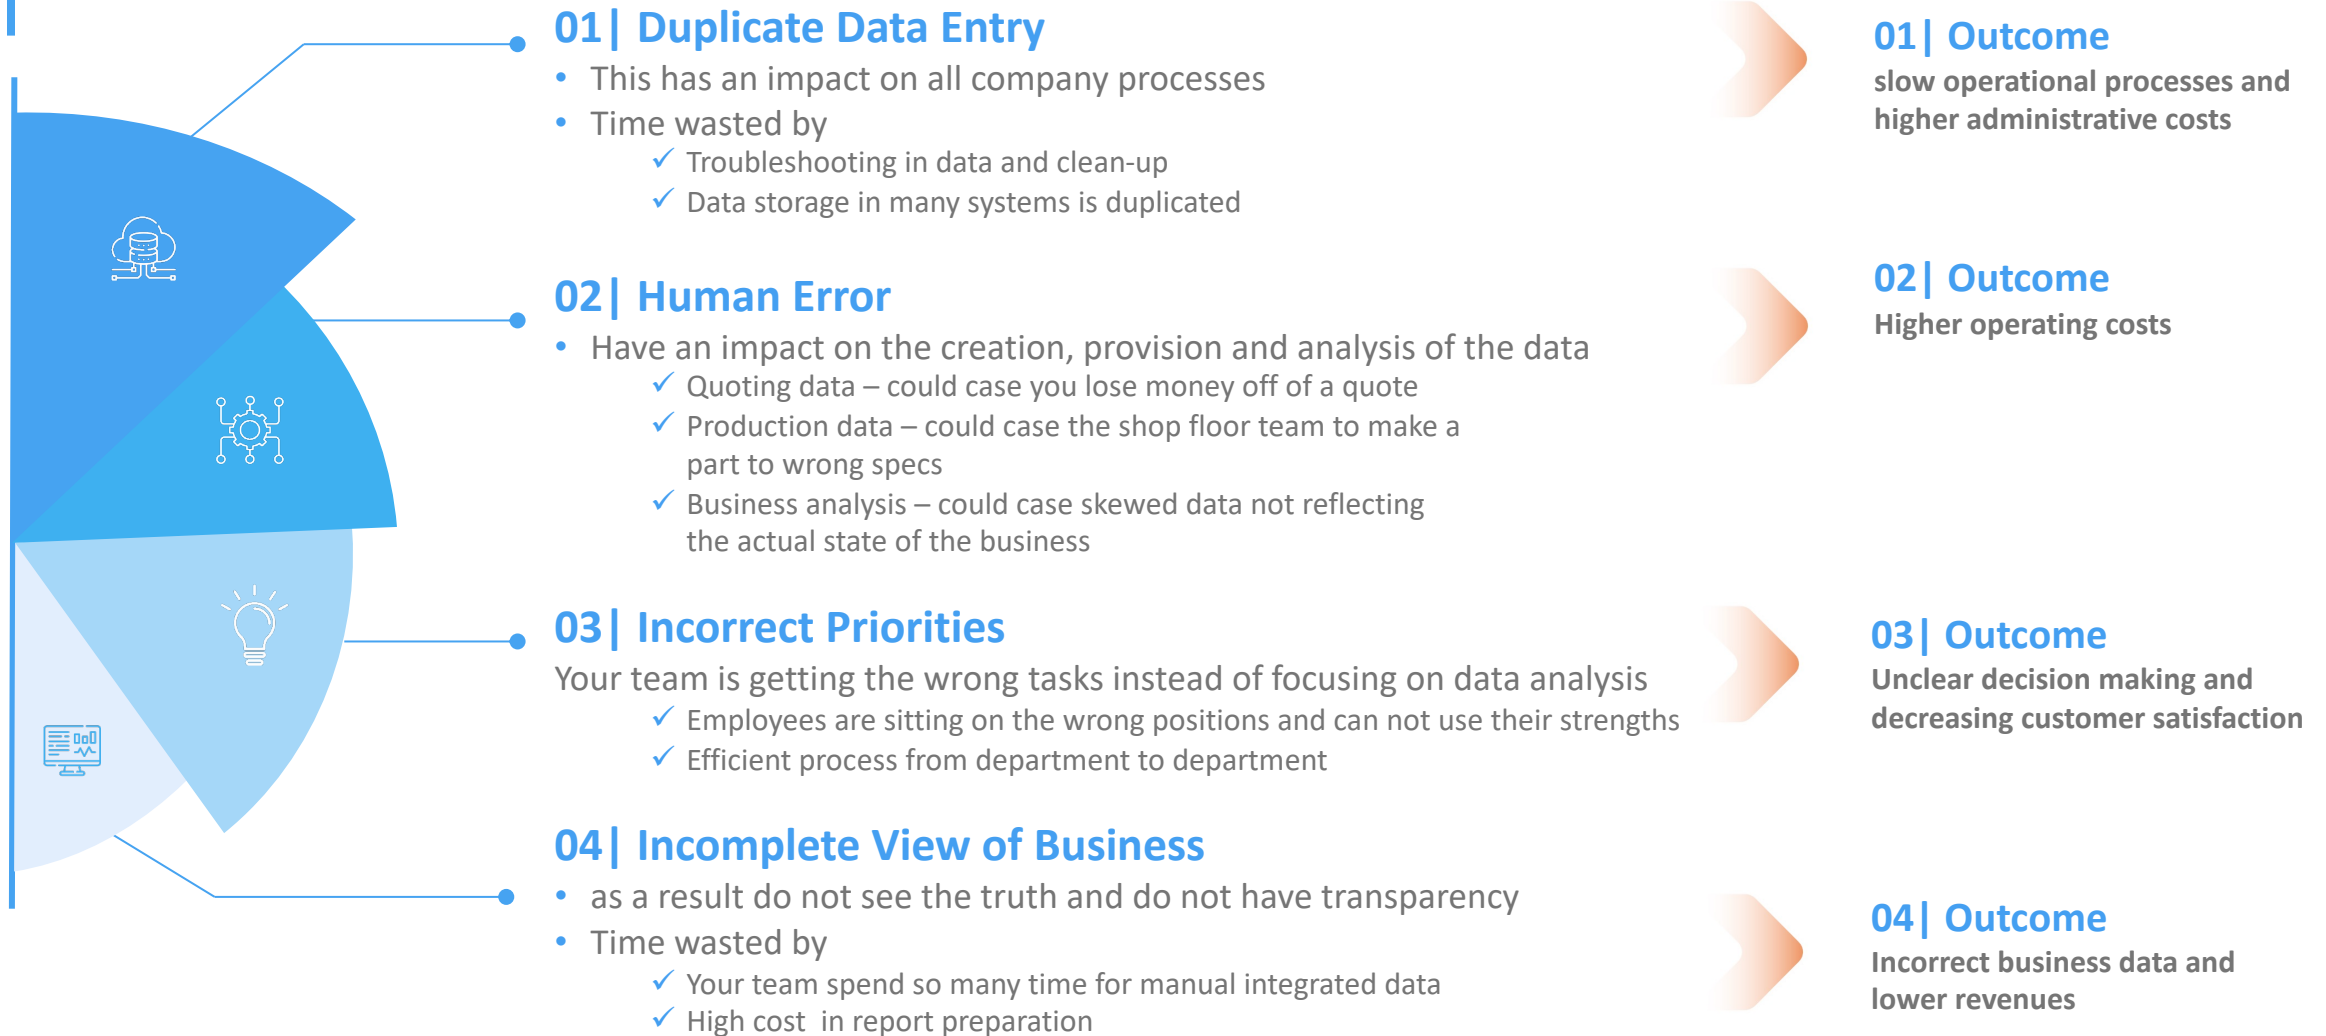

If you answered anything other than **ONE**,  
manage multiple systems or different dataset  
could be costing you significant amounts  
every month

For many companies, the manufacturing business looks like this

A **data silo** is a repository of data (knowledge) that remains under the control of **one** department or a **single** person and is isolated from the rest of the organization

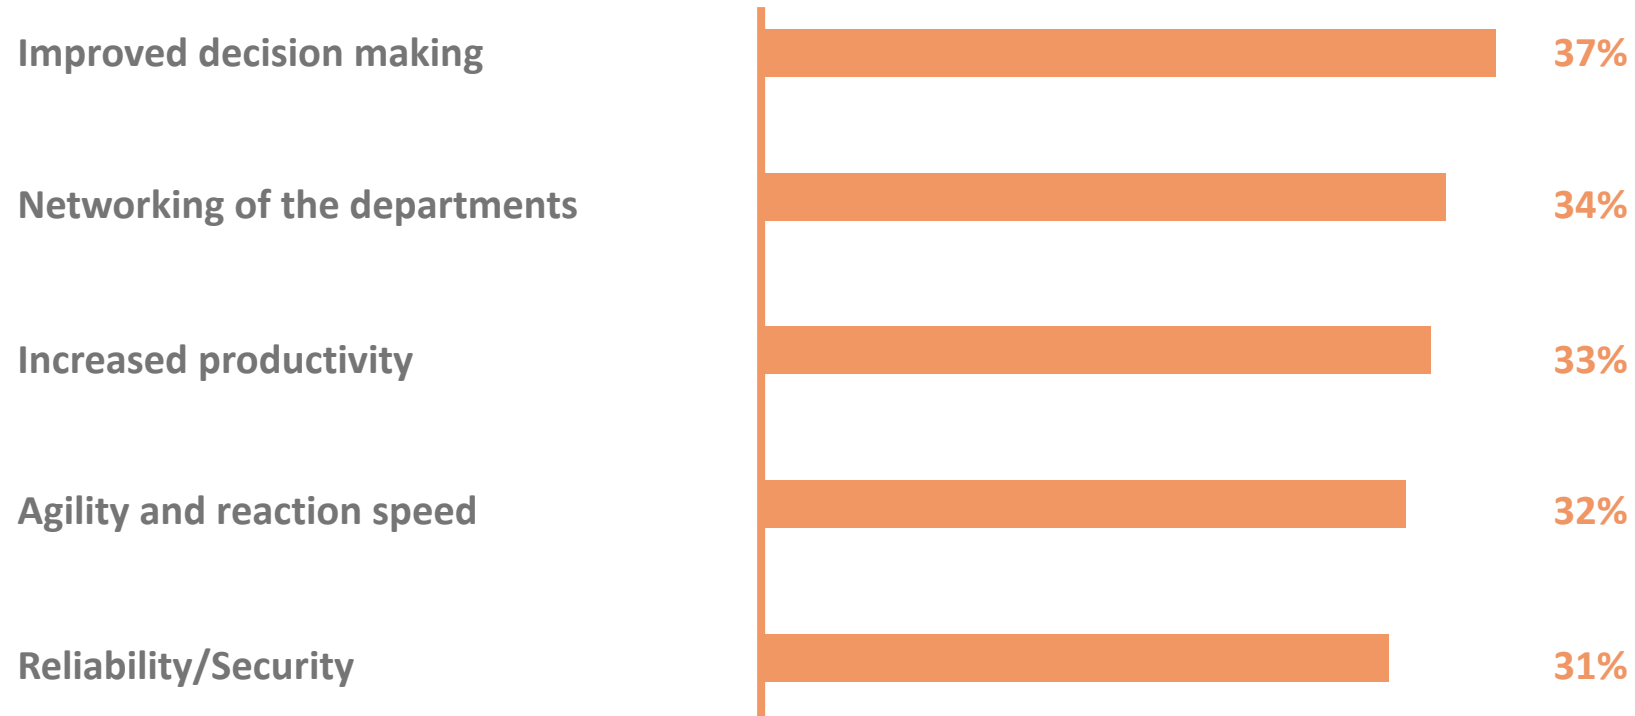

# IMPACT OF DATA SILOS ON YOUR COMPANY

# DATA AS A SUCCESS FACTOR

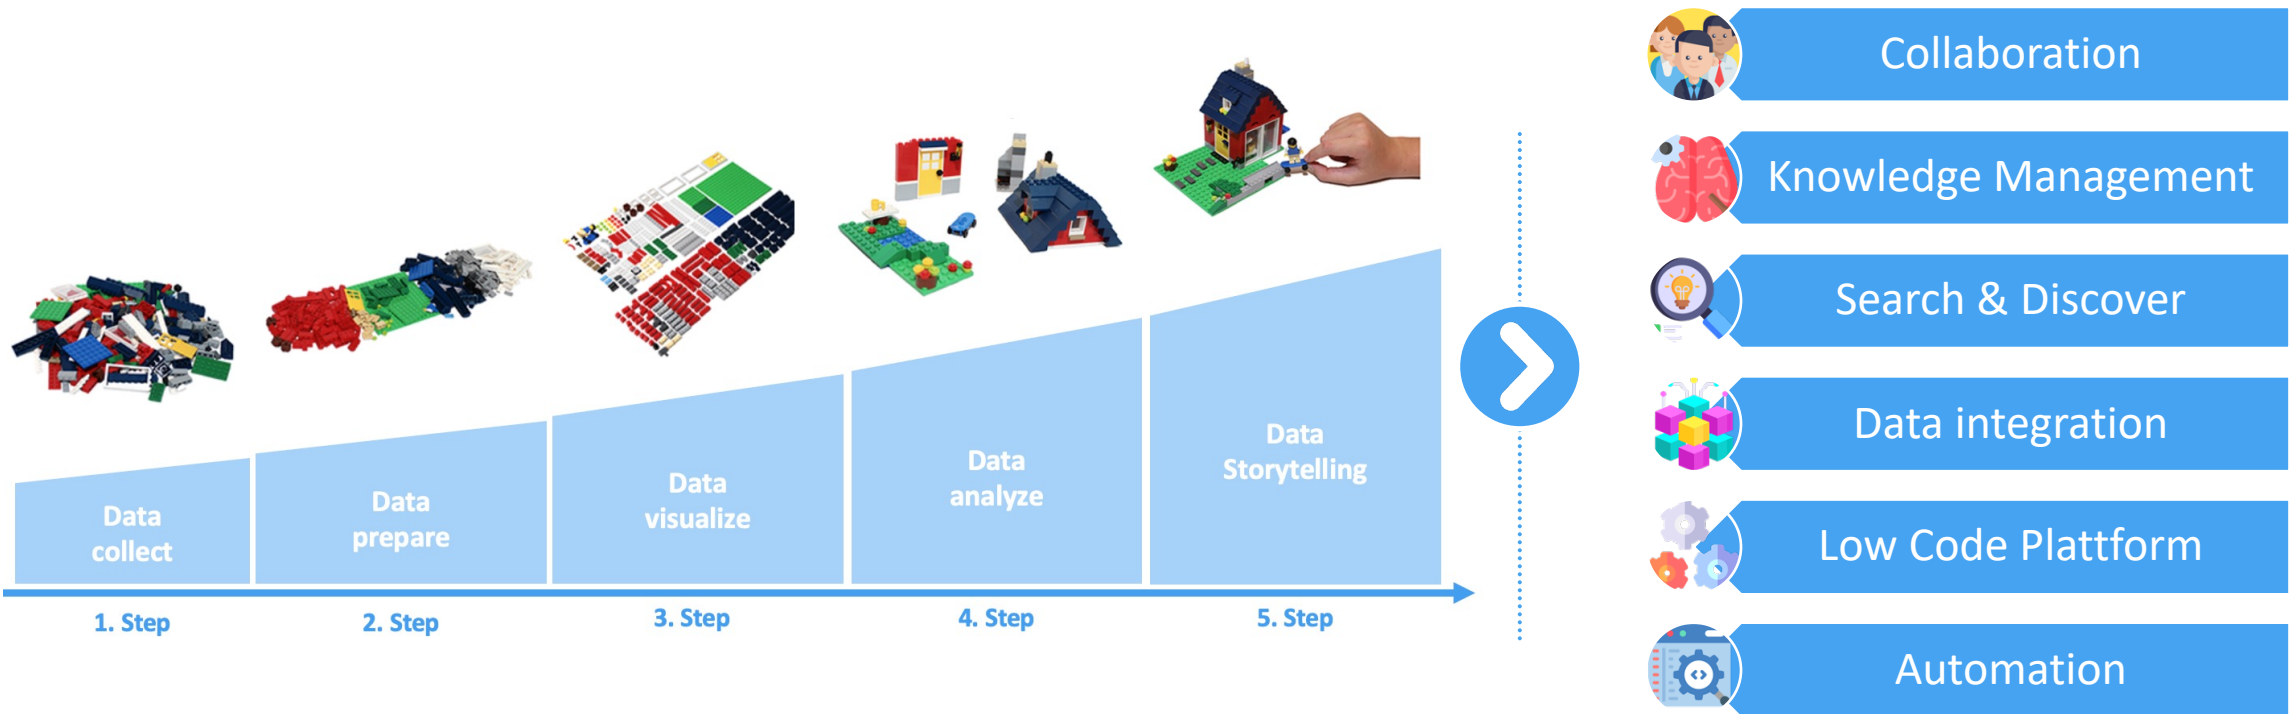

Market opportunities - companies that collect and evaluate data are **3x more** successful than other companies

data-driven companies identified the following benefits

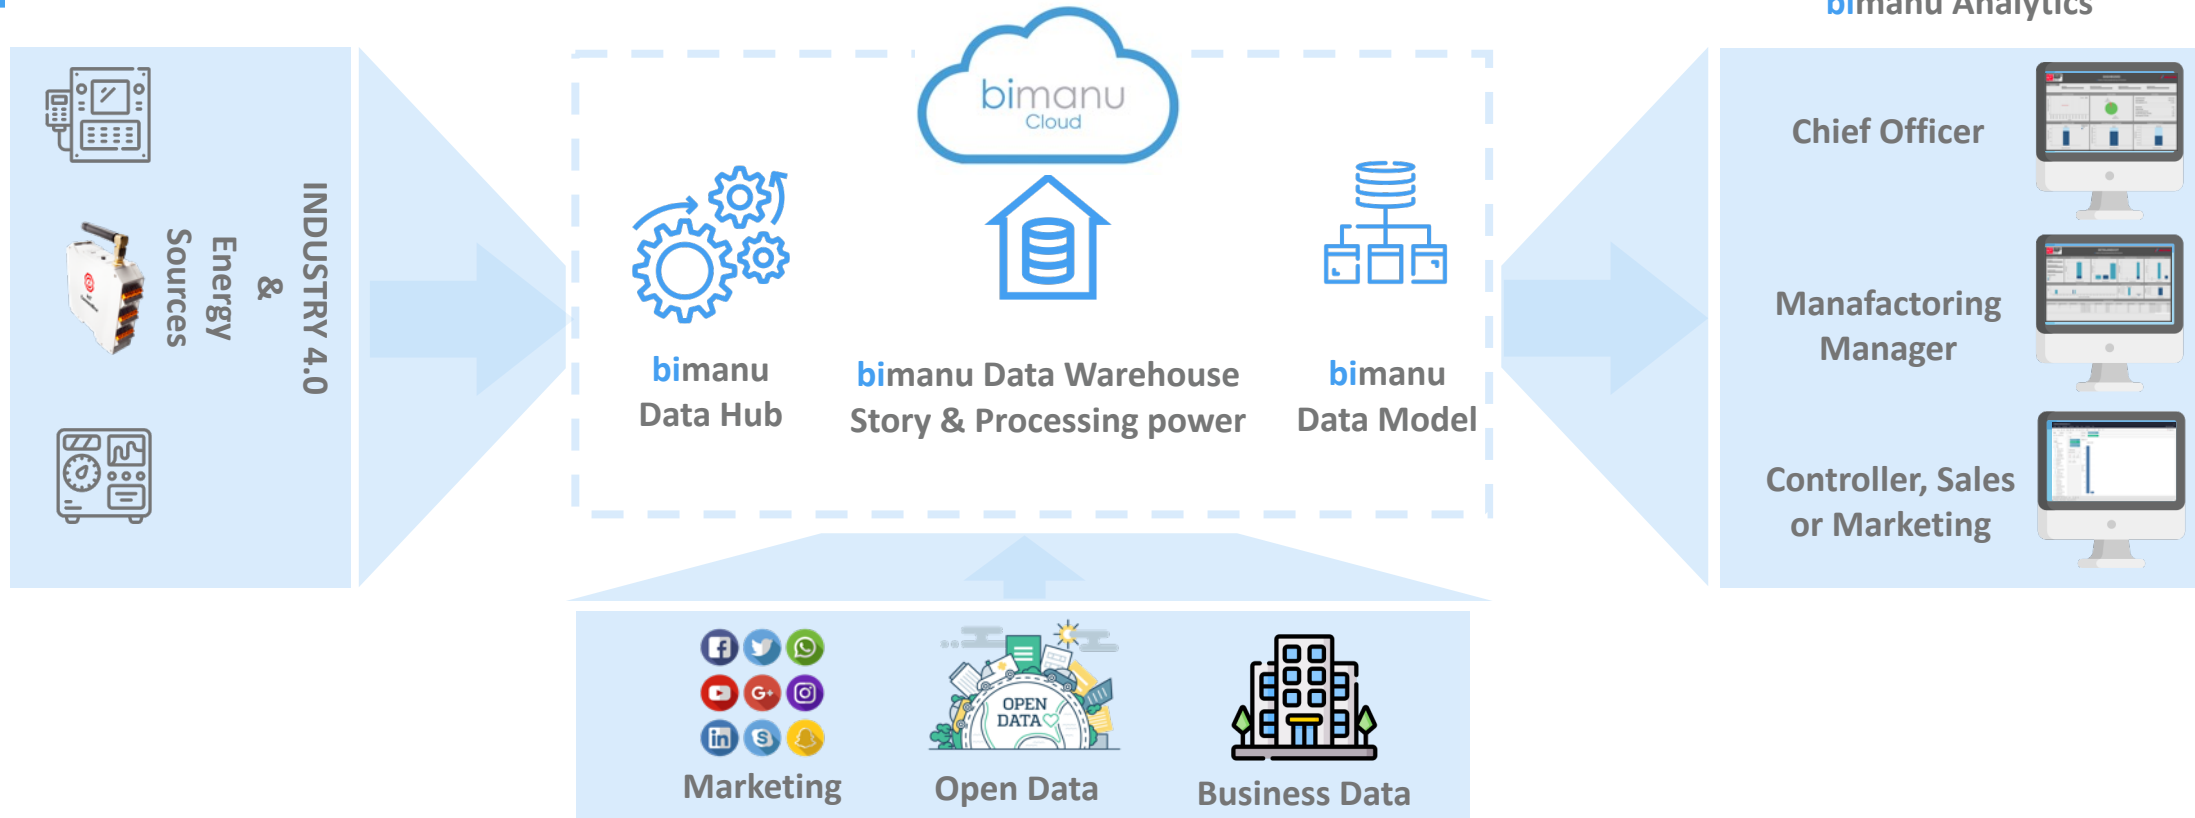

# SOLUTION

An integration and analysis platform that offers your users more than a classic business intelligence system and a way to use their company data profitably for themselves and their employees.

# OUR BIMANU APPROACH

An automated data integration and analytics platform that lays the foundation for AI

## THE ADVANTAGES:

 360 degree company view

 Reduction of operating costs

 Use data knowledge

 One system for many applications

# PRODUCT OVERVIEW

## Contact tracing

- COVID19 - Capture with IoT sensor technology
- Tracking the infection chains

We are the red  
carpet for AI  
(Artificial  
Intelligence)

---

# OUR VISION

To enable every medium-sized company to use the production factor "data" profitably for the company and their employees without having to use their own resources.

Away from the  
Data swamp

Breaking up  
from data silos

Monetize  
the company Data
