Bank Facility Management on Dynamics 365 for finance and operations

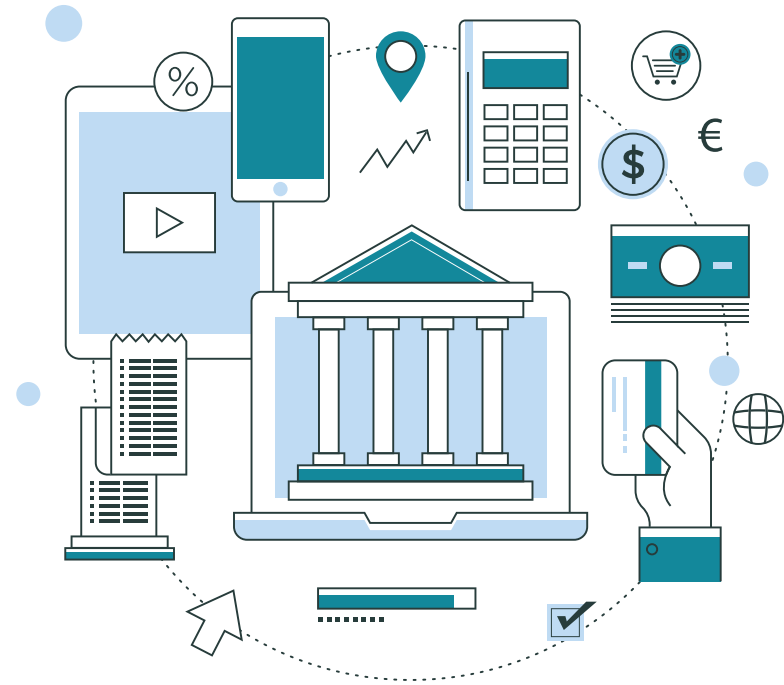

In today's globally competitive world, the capital needs of businesses have grown by leaps and bounds. More and more businesses are using several debt instruments to finance their need of expansion. When companies are in such rapid expansion phase, they need a robust system to manage their loans effectively and hence maximize shareholder value. Bank facility management on Dynamics 365 for finance and operations provides the company with an efficient system to manage their various bank facilities information like loans outstanding, utilized loans, collaterals, interest payments, instalment payments etc. effectively and easily.
