

Transform your business and optimize your patients' health outcomes.

SmartCARE 360 deployed on Microsoft Azure allows healthcare providers to engage patients and empower care teams

SmartCARE 360

SmartCARE 360 is an intelligent, trusted, and secure health cloud platform, a connected solution that engage patients and empower care teams, while saving costs by improving clinical and operational efficiency that will transform your business and optimize your patients' health outcomes

- Allow patient access medical services and medication history
- Provides healthcare recommendation based on patient clinical data insight
- Provide an electronic register for patient referrals, pre-authorizations, and hospital admissions.
- Integrate with your claims management system
- Use Artificial Intelligence for automatic pre-authorization determination
- Allow patients to find providers based on their health plan
- Use virtual assistant (chat bot) to find providers
- Securely contact your provider for appointments

Collaboration

- Share patient data between providers
- Transform business process between payer and provider
- Connect patients with payers and providers

Analytics

- Use patient and utilization data to get deep insights with machine learning
- Optimize resource utilization using predictive models

Reliability

- Use an intelligent, trusted, and secure health cloud platform that complies with HIPAA/HITRUST

Engagement

- Provide connected solutions that engage patients and empower care teams
