

## OUR SERVICE

Based on proven hardware, software and connectivity modules and a close partnership with Microsoft Azure, qiiio takes the complexity out of the IoT by providing customers with complete end-to-end solutions that solve real-world problems quickly, securely, and cost-effectively.

With a modular architecture, customized solutions can be adapted to diverse enterprise applications with rapid PoC and extremely short time-to-market.

## ABOUT US

qiiio aims to decrease inefficiency in industries by introducing connected and intelligent devices.

# WE HELP INDUSTRIAL COMPANIES CONNECT WITH ASSETS

### 95/5 blueprint

Our philosophy is that 95% of IoT solutions rely on the same underlying architecture. Based on standards, qiiio's solutions require only 5% customization to quickly and seamlessly integrate into a customer's business.

### Expertise

Our team has strong expertise to conceptualize customer pains, design and develop an overall solution from hardware to the cloud accordingly.

### Edge to cloud solutions

We possess deep know-how in hardware devices, wired and wireless connectivity, SIM card management and Microsoft intelligent edge (Azure Sphere and IoT Edge). Our holistic approach results in end-to-end solutions that address all IoT requirements from sensor to cloud.

### Strong partnership

Our proven hardware and software modules operate seamlessly with Switzerland's leading telecom service provider Swisscom and Microsoft Azure cloud services.
