

BIBuilder4Dynamics D365FO – “the smart way to your data”

SCALES

BIBuilder4Dynamics D365FO – “The smart way” to your data

The Product

- Generic and simple implementation to dataextract
- No need for external consultants
- No Maintenance after implementation
- Complex data in a Simple and fast overview

What is BIBuilder

BIBuilder4Dynamics is D365FO extension and a Windows client data extraction application. With the Tool you can build a full best-practice BI solution with staging database, data warehouse and cubes based on standard Microsoft SQL Server components

Access all data from D365FO database and other datasources, without the need for developers or deployments. Assists the user in simplifying the complex data structure of D365FO and can be used with minimum D365 knowledge

Agile development Data model - extended in minutes and the configuration is done via a Windows client application, but the end result is purely Microsoft SQL Server components

WHY - BIBuilder4Dynamics D365FO ?

- Quick implementation of/and access to your cloud data = Faster decision making = Money and time saved
- Data from multiple Data sources, extensions and ISV's= “The full picture” = High dataquality decision databasis
- Agile implementation, maintenance and generic standard D365FO = no dependence to the partner = Low risk

HOW - BIBuilder4Dynamics D365FO ?

POC – Trial - Demo

FAQ's – Technical /Commercial questions – Please feel free to contact our commercial responsible - Henrik Flindt - +45 22 800793 – henrik.flindt@scales-group.com and start the proces to an easier data extratcion environment and future desicion making basis with minimum risk and time consumption.

“BIBuilder4AX has helped us reduce our dependency on external consultants”

Jesper Britze, Chief Digital Officer, Hedeselskabet

Optimized for Microsoft Dynamics AX 2009, 2012 and AX7 data analysis

Quickly gain insight to your data in interactive reports and dashboards

Rapid and agile development allows insight in a matter of days

Access your analysis from anywhere on any device

Substantially simplifies the complex data structures in AX

Open your data up for self-service BI, without compromising security

“BIBuilder4AX has helped the IT-department save 30-50% of our time on specific tasks”

Brian W. Paamand, IT-manager, Gosh Copenhagen
