

# THE SCAPTIFY CONNECTOR

*The best of two worlds*

## SYNCHRONIZATION

### MULTIPLE SHOPS

Manage all your shops in one Dynamics 365 Business Central. For each shop you have a separate setup at your disposal.

### DIRECT SYNCHRONIZATION

Synchronize directly without using a converter tool. Avoid two points of failure and use a better, more stable and more efficient connection.

### SYNC ITEMS IN BOTH WAYS

Upload your existing products from Microsoft Dynamics 365 Business Central into your Shopify online store and the other way around in a few steps.

### SYNC STOCK IN BOTH WAYS

Sync your stock from Microsoft Dynamics 365 Business Central to Shopify or from Shopify to Microsoft Dynamics 365 Business Central.

### ORDER NOTE SYNC TO SHOPIFY

The order note in the Shopify store will be synced to the Shopify order in Dynamics 365 Business Central to a new field "Work Description".

### SYNC ITEMS IN BULK

The synchronization from the Shopify store to Dynamics 365 Business Central is updated so the possibility of e.g. 14.000 items is possible.

### SYNCHRONIZATION OF EXTRA ITEM TO SETUP

Setup new fields "Sync Item Extended Text" and "Sync Item Attributes" on the Shopify Shop Card in Dynamics 365 Business Central.

## ORDER PROCESSING

Transfer orders automatically into Microsoft Dynamics 365 Business Central and go through the entire flow in a few steps.

### AUTOMATIC CREATION OF ORDERS

Based on a template, new customers in Shopify are automatically created in Microsoft Dynamics 365 Business Central.

### AUTOMATIC CREATION OF CUSTOMERS

Manage Shopify items efficiently in Microsoft Dynamics 365 Business Central based on a predefined template.

### AUTOMATIC CREATION OF ITEMS

Automatic e-mail notification with tracking code once the order is flagged as "shipped" in the Microsoft Dynamics 365 Business Central system.

### DELIVERY MAIL NOTIFICATIONS

### SETUP FOR SKU

Fill the SKU on an item in the Shopify store by filling the new field "SKU Type" on the Shopify Shop Card in Dynamics 365 Business Central:

- Item No. (default value) • Variant
- Barcode
- Item No. + Variant

If you choose the option "Item No. + Variant" as "SKU Type", you also have to define a "SKU Field Separator", e.g. |.

## GENERAL

### No double entry

Avoid double entry of data such as customers, items, orders and shipments through synchronization.

### Less human error

Limit human errors by automating your process.

### Streamline

Make fewer errors and delays by streamlining the process using our Shopify Connector.

### Easy setup

Limit human errors by automating your process.
