

Simplify Office 365 License Management & Reporting

How a Single Pane of Glass Helps Admins

When admins can partition permissions, assign licenses and monitor usage from a single vantage point, processes are more efficient, secure and easy to analyze.

Improves Cost-Efficiency

Accelerates Workflows

Tightens Security

Deepens Insights

“CoreView enables us to create reports on information we were never able to see before... and easily identify inactive or disabled accounts.”

DANIEL PARK
Information Systems Manager,
The Wonderful Company

Streamlined Licensing Oversight

- **SUPPORTS AUTOMATED WORKFLOWS**
Options for automated provisioning and deprovisioning processes help you keep licenses and access up-to-date.
- **REDUCES LICENSE WASTE**
End overspending on inactive, oversized and duplicate licenses by finding them quickly and relocating them efficiently.
- **ENCOURAGES CUSTOMIZATION**
CoreAdmin not only comes with built-in webform-based actions, it also allows you to embed custom PowerShell scripts.

Secure Access & Delegation

- **OFFERS ROLE-BASED ACCESS CONTROL (RBAC)**
CoreAdmin lets you control access to any aspect of the management interface, including PowerShell scripts and reporting.
- **IMPROVES SECURITY & AUTONOMY**
The ability to segment tenants into virtual sub-tenants lowers the number of people with global admin rights without limiting business unit autonomy.

Robust Reporting

- **INCLUDES REPORTS OUT OF THE BOX**
CoreView offers more than 175 reports that you can customize.
- **FACILITATES METADATA ANALYSIS**
With CoreAdmin, you can run reports by function, cost center, and other metadata to quickly find vulnerabilities and savings opportunities.
