

# Barcode and Report Management App

This solution will help companies to use different Barcodes like UPC-A, UPC-E, EAN-8, EAN-13, CODE-14 and CODE-128 inside Business Central. Companies can create their own Barcode with the help of “UPC Country Code” and “UPC Manufacturer Code”. Companies can use Barcodes in the item level, item variant level, bin level etc. Barcodes will help to scan and cross refer to the items. Barcodes can be printed in the different document reports and external reports. This solution also provides different document reports like Sales Order Confirmation, Sales Invoice, Return Authorization, Picking List, Packing List etc. which helps companies to print very professional documents and send their customers.

*Images of the Barcode values are requested using the Azure Functions and are stored inside the database so the latency normally associated using the webservice is avoided when running the reports to print these barcodes.*

# Highlights:

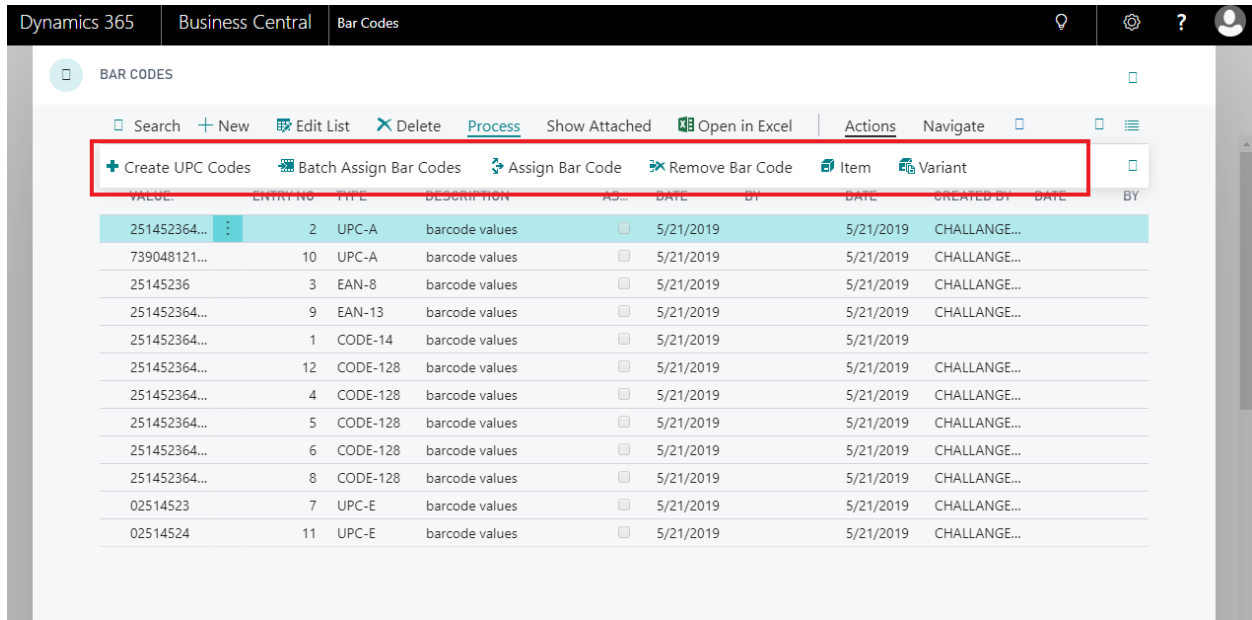

- Supports different barcode types like UPC-A, UPC-E, EAN-8, EAN-13, CODE-14, and CODE-128.

The screenshot shows the Dynamics 365 Business Central interface for the 'Bar Codes' table. The table contains 12 rows of data, each representing a different barcode type. The columns include Barcode Value, Barcode Entry No, Barcode Type, Description, Assigned Date, Assigned By, Creation Date, Created By, Removed Date, and Removed By. The first row is highlighted in blue.

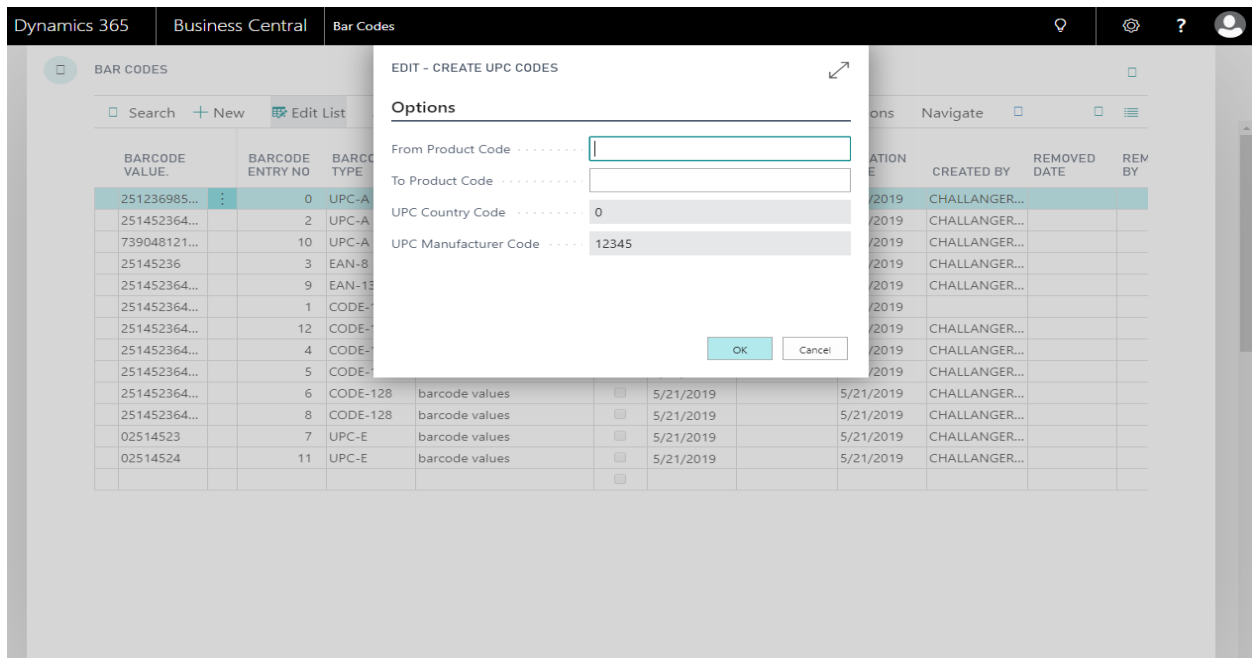

BARCODE VALUE.	BARCODE ENTRY NO	BARCODE TYPE	DESCRIPTION	AS...	ASSIGNED DATE	ASSIGNED BY	CREATION DATE	CREATED BY	REMOVED DATE	REMOVED BY
