UltiBuild : Solution for efficient construction management

What is UltiBuild?

UltiBuild is an innovative app for Microsoft Dynamics 365 – a high class business management system, capable of covering all requirements and need of companies in construction industry.

UltiBuild provides you a complete 360° view of construction projects from the bid and quotation to the customer invoicing, through all executing processes (sub-contracting, purchasing, labor, equipment usage, etc.).

"ULTIBUILD PROVIDES YOU WITH MANY BENEFITS FOR EFFECTIVE MANAGEMENT OF COMPLEX CONSTRUCTION PROJECTS."

A new challenge for each project

#1 in tenders
UltiBuild has been specifically designed to support complex quotations with thousands of lines and lots of versions and revisions. It also provides a convenient way to exchange service specifications with business partners.

#1 in execution
UltiBuild provides powerful capabilities to automate the full purchasing process. RFQ, subcontract agreements, purchase orders can automatically be created from the service contract details with a high level of flexibility.

#1 in budget and cost controlling
UltiBuild enhances the budget creation (up to 5 different views) and provides a real time cost controlling from committed cost to estimate at completion.

As diverse as the construction industry itself

UltiBuild is design for
Primary construction industry: General construction and civil engineering, bridge and tunnel construction, roofing, carpentry, detached houses builder
Finishing construction work: Electrical installation, gas, water, heating and ventilation and air-conditioning installation, insulating, building carpentry, floor...

Our references
Vandenbussche, Houben, Tectum, Ghelamco, Groupe CIFA

UltiBuild for Microsoft Dynamics 365 for Finance & Operations enhances customer service, contractor's relationship management, facilitates executed projects invoicing, and simultaneously allows cost control, while consolidating information from various divisions and companies.
