

Corporates: Detect **expertises** and value your employees' career paths

To stay competitive in a tight labor market, companies have to re-evaluate their retention strategies.

This entails for companies/customers to know and develop their employees' full potential and expectations. This is Crafty's purpose.

Ideal Solution

Enable employees to value their skills and truly understand what other employees are doing.

Through a collaborative platform that allows them to simply express skills, expectations and needs.

Desired Outcomes

Crafty's goal is to foster internal mobility, plan your training strategies and transform individual interviews to better monitor career development.

Challenges

According to Dell Study, 85% of jobs from 2030 do not exist yet.

To (re)make sense of the work!

Value your employees to predict tomorrow's career paths

As an employee, knowing your areas of expertise is hard. As a manager, it is even harder to identify what your employees are good at and where they want to go. Crafty helps you to better identify and predict your employees career paths.

Know your employees

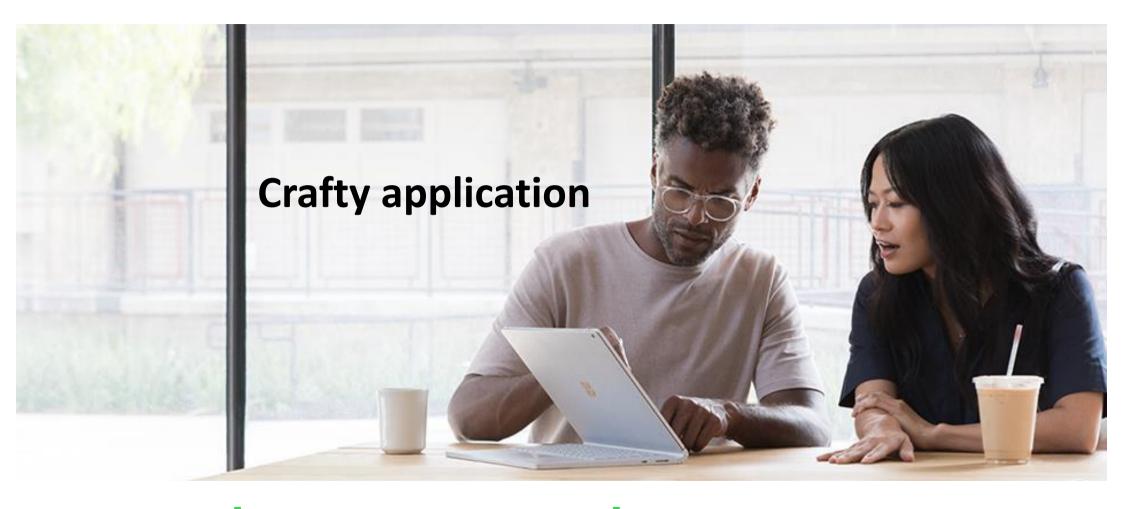

Improve your HR data quality and better identify your employees' skills and expectations.

Value your employees

Plan coherent career paths and enable your employees to better decide their career opportunities

Engage your employees

Forster internal mobility, formation
