

Porini | for Dynamics 365  
ERP

## International Fashion & Apparel solution for Microsoft Dynamics 365 for Operations

The comprehensive and scalable business software solution that fully meets the continuously changing requirements of the fashion, apparel, textile, footwear and accessories industry and enables to work across the whole supply chain in the most effective and efficient way.

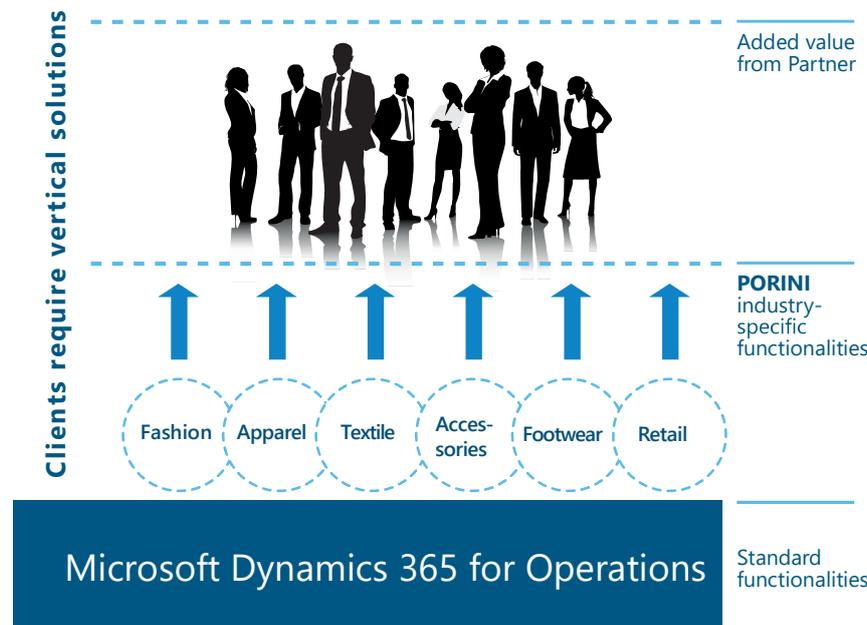

# PORINI ERP for Dynamics 365

Integrate complex production processes, routings and item data to increase efficiency, improve traceability and manage cascade connected product specifications along the entire supply chain.

## DESCRIPTION

**PORINI ERP** for Dynamics 365 addresses the most complex requirements of item coding traceability and process flexibility for companies producing and marketing fashion and apparel items, from fibres to yarns, industrial fabrics, home textile, carpets, clothing, footwear, designer collections and fashion accessories.

## THE CHALLENGE

Global competition, increasing difficulties due to the dispersal of supply chains and ongoing company mergers and acquisitions are a key challenge for Apparel & Textile industries that must meet the requirements of demanding clients, bring products to the market quicker and achieve profitability. However, these businesses are often struggling with fragmented information systems that are not able to manage the required number of item variants; this substantially reduces flexibility and visibility in managing operations.

## OUR SOLUTION

With robust industry-specific functionalities, this scalable and comprehensive business software solution can easily adapt to your continuously changing requirements and enables you to work in all business areas in the most efficient and effective way.

## PORINI

Founded in 1968, PORINI has always focused on the Apparel & Textile market where it boasts a best-in-class reputation. Since 2007, it has developed the world-wide most popular vertical Apparel & Textile solution based on Microsoft Dynamics 365 platform. Porini develops, maintains and markets this solution through a network of qualified partners in Italy and around the world.

## THE BEST SELLER AMONG THE INDUSTRY-SPECIFIC SOLUTIONS FOR Microsoft Dynamics 365 for Operations

Thousands of users worldwide demonstrate the success of a comprehensive and reliable software. With its high flexibility, it fully meets the multiple features of an industry that is by definition heterogeneous and fragmented and where supply chain players must interact with their partners in increasingly shorter time and in the most efficient way.
