

## Data Integration Platform

Unlock Meaning Through a Data Integration Platform powered by Microsoft Azure

Having a common understanding of data and making sense out of it within an organization is the most pressing topic when moving towards the digital age. KI group's Data Integration Platform empowers you in harmonizing your data lying around in different legacy systems and unlocks meaning to increase business insights.

Imagine you can access any data in your organization no matter the format, the size and the source. How much would it empower you to make faster and more resilient decisions? KI group's Data Integration Platform helps you to centralize all your data sources in one single layer and gives you better insights into your business relevant activities. Our solution is not just a piece of software but an infrastructure capable of viewing data as agile and giving meaning to your otherwise unused and vague data.

- Manage your data across all environments
- Achieve a common understanding of your data
- Unlock meaning out of your data
- Improve data quality both downstream and upstream
- Eliminate manual work and the maintenance of point-to-point connections
- Get notified on sensitive changed events
- Apply different data access rules based on the user

### Data Integration

- Integrate any data across your IT landscape
- Stream data from data sources to serve real-time applications
- Catalog your entire data ecosystem

**Reduce Integration Costs by 90%**

### Data Validation

- Standardize, correct and match data to reduce duplicates
- Identify relationships, and correct quality issues proactively
- Show data quality impact both downstream and upstream

**Reduce Validation Costs by 50%**

### Data Automation

- Automate your data integration pipelines
- Automate your data quality checks
- Allow your team to build on each other's work

**Reduce Manual Work by 90%**

*"MobiLab helped us to identify key areas within our master data management landscape, to get a common understanding of our MDM architecture and its need for improvement"* Jörg Hellwig (CDO – LANXESS AG)

*"As a major wholesaler data is at the core of our business. MobiLab supported us with their skilled engineering team from conception to production in our master data management and PIM efforts"* Holger Klähn (Director MDM – METRO|NOM GmbH)
