

**Best document and
information handling.**

**Better customers.
Good business.**

REQUEST. COLLECT. VALIDATE.

ezidox™ untethers businesses from the daily grind of document and information management, freeing up time that allows for business growth without increasing capacity. Staff can invest more quality on other aspects of the business.

In partnership with Microsoft, ezidox is a software service that eliminates the inefficiency and inaccuracy of manually processed documents submitted digitally or otherwise between a business and their customer. This is done by leveraging automation and in-built intelligence to reduce time, cost and risk; all in one platform.

Why customers use ezidox™

SAVE MONEY

ezidox reduces the costs of collecting, verifying and processing documents by up to 90%.

BUILD BUSINESS

Reducing the time to process information and documents, which accelerates transactions by 30% meaning less drop-off and faster revenue.

REDUCE RISK

Encrypting documents minimises risk of identity theft and the audit trail protects all parties.

“One of the immediate positive impacts our business was able to measure as a result of the implementation of ezidox™, was the impressive reduction of time our admin staff member spent on document processing. Normally this task swallowed eight hours of her day, and this is now only taking up two hours a day, leading to a 75% increase in overall productivity”

Jason Puxty - Mortgage Choice

management and handling**

Why ezidox™?

ezidox™ began its journey in 2014 in response to an industry wide challenge in the capture and collating of documentation. ezidox™ has since developed into a popular, powerful, scalable and flexible platform.

Initially developed for the mortgage market, ezidox™ received a major award from Citibank in the 2015 Mobile Challenge as the Most Innovative in Productivity. ezidox™ was then invited to participate in a Fintech Accelerator. Which led to a trial with a Tier 1 bank's direct mortgage business unit where ezidox™ delivered unprecedented productivity results. Full SOC 2, Type 1 certification followed in January 2019.
