**BETTER INSIGHT**

## **LEARN STATUS - TAKE ACTIONS**

Application Health Control with Bluesoft Connector can get insight on number of web applications in a single well-tailored dashboard. Monitor your live web application and automatically detect performance anomalies.

It works for apps on a wide variety of platforms including .NET, Node.js and Java EE, hosted on-premises, hybrid, or any public cloud

## HOW WE BUILD IT

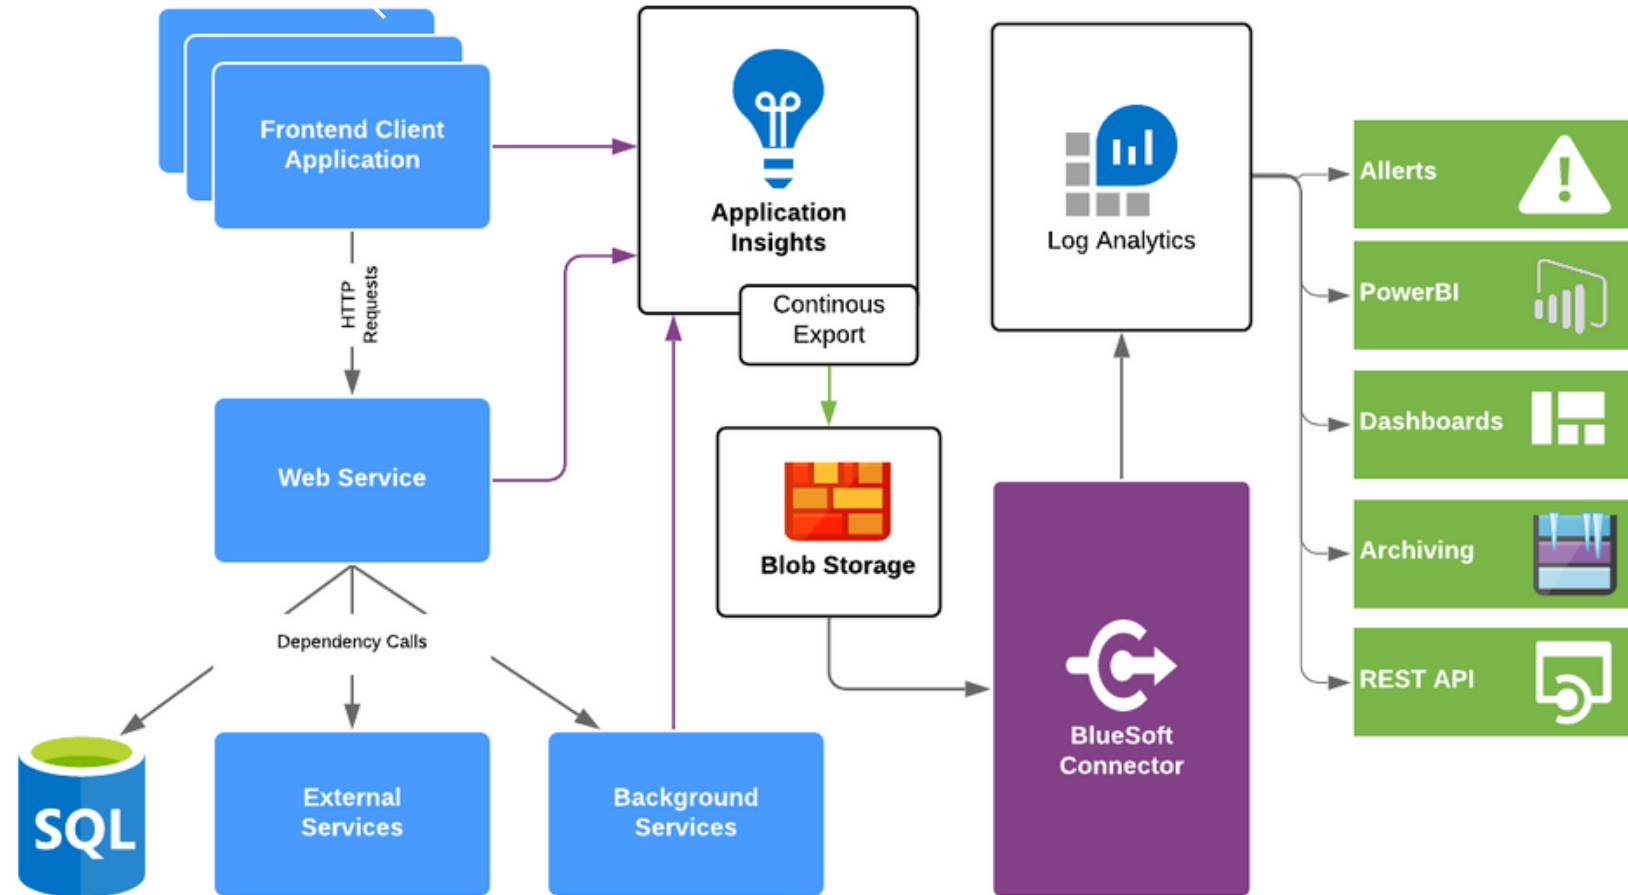

# COMPONENTS

- Azure Application Insights – where Bluesoft defines connections to your applications
- BlueSoft Connector – which acts as a bridge between Azure Application insights and Azure Log analytics
- Azure Log Analytics – where BlueSoft delivers customized dashboards and alerting definitions

All delivered as a service, maintained and operated by BlueSoft engineers
