

Glück & Kanja CSOC

Improve Your Security Posture

Microsoft's cloud security solutions are much more powerful than anything currently available in the on-premises infrastructure. The cloud offers many great benefits with the ability to use Threat Intelligence (TI) along with machine learning on all Microsoft customers.

What is the Cloud Security Operations Center (CSOC)

Cloud SOC provides security monitoring, response and advisory services for your Microsoft 365 based infrastructure. This protects against cyberattacks and continuously improve your security posture. We know that our customers can be extremely busy; therefore, we want to help save them time. For this reason, we create monthly safety reports in which we prioritize and focus on critical vulnerabilities.

Why customers use G&K CSOC

- Glück & Kanja has successfully deployed hundreds of thousands of users and devices on Microsoft 365 and Windows 10.
- Our CSOC combines the protection of our customers' cloud infrastructure with the continuous improvement of their security posture.
- Glück & Kanja has more than 20 years of experience in Enterprise IT Security.
