

THE WORKSPACE ENGINE IS A SELF-SERVICE FRAMEWORK TO SUPPORT THE AUTOMATION AND EVOLUTION OF COLLABORATION WORKSPACES IN OFFICE 365 AND SHAREPOINT

***“Empower your information workers and unburden your IT-department from repetitive tasks”***

## Recognize this?

- Do your end-users contact IT to create workspaces?
- Do your end-users contact IT to give access rights?
- Do your end-users contact IT to make modifications to one or more workspaces?
- Do your end-users feel like they are lacking control?
- Can your IT-team not solely focus on their main tasks as they must deal with the above requests?

## Business Benefits

### REDUCED

- User frustration
- Human errors
- Complexity
- Risks
- Maintenance costs

### INCREASED

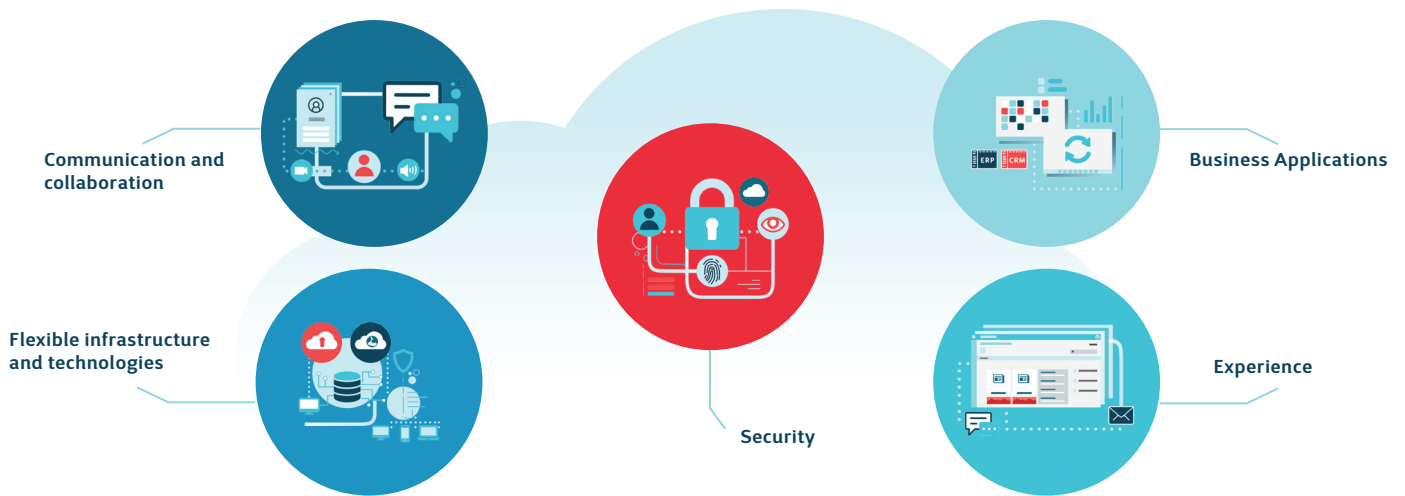

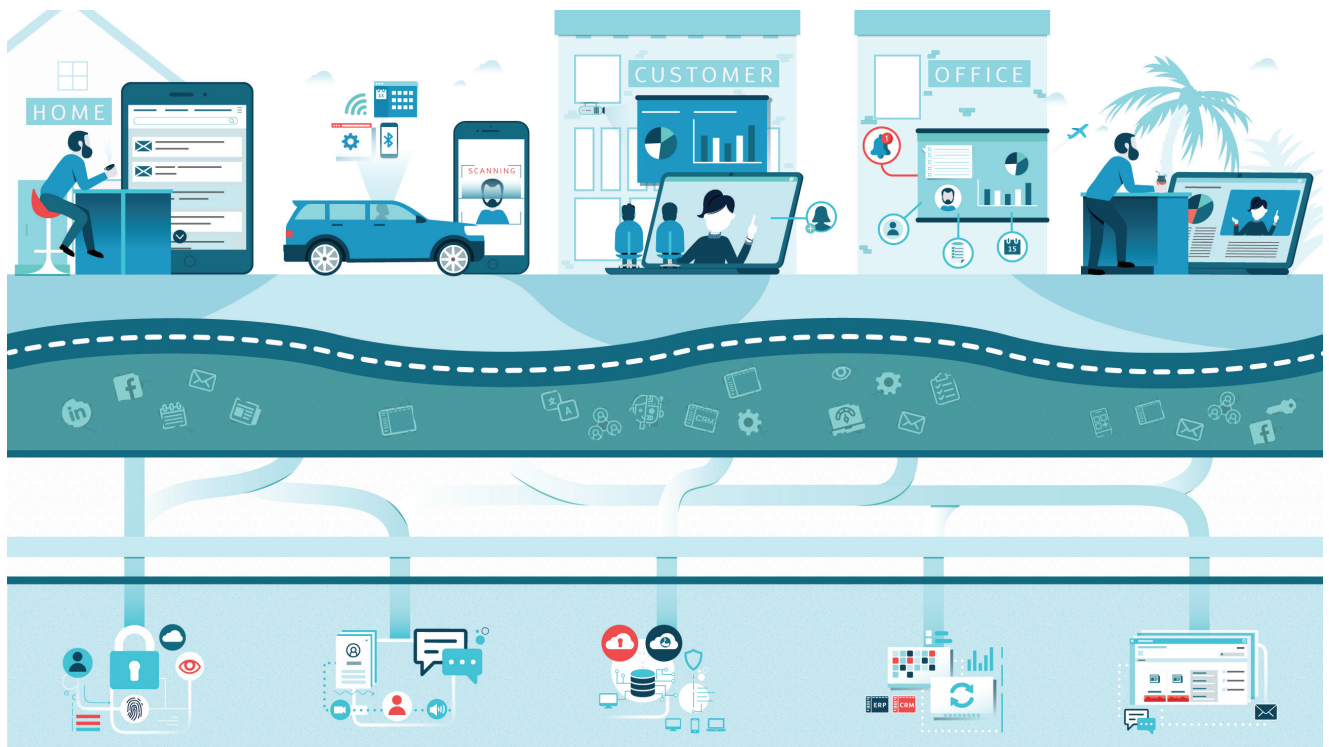

- Ownership
- Unburdening of IT
- Productivity
- Standardization
- ROI
- Speed of roll-out

## Workspace Engine

The added value for your company is a more standardized way of working, increased productivity, reduced risks and maintenance costs. The business feels empowered while IT can focus on the usage and governance of the solution – and grow as a business partner instead of a ticket resolver. The Workspace Engine allows your company to:

- Streamline, optimize, secure and automate processes
- Improve self-service, adoption and accelerate the roll-out of workspaces
- Overcome silos by working together in virtual and physical teams
- Integrate with other business applications (e.g. CRM)
- Define templates which can be used to create standardized workspaces
- Secure workspaces and keep control over the content of your environment (Governance)
- Apply template changes to every existing workspace
- Exploit the power of the Office 365 ecosystem by creating workspaces based on SharePoint, Teams, Planner, ... components as a logical whole

# THE USER EXPERIENCE

## Roadmap to become truly digital
