Operational company with Multiple financial companies

Dynamics 365 Multi Company

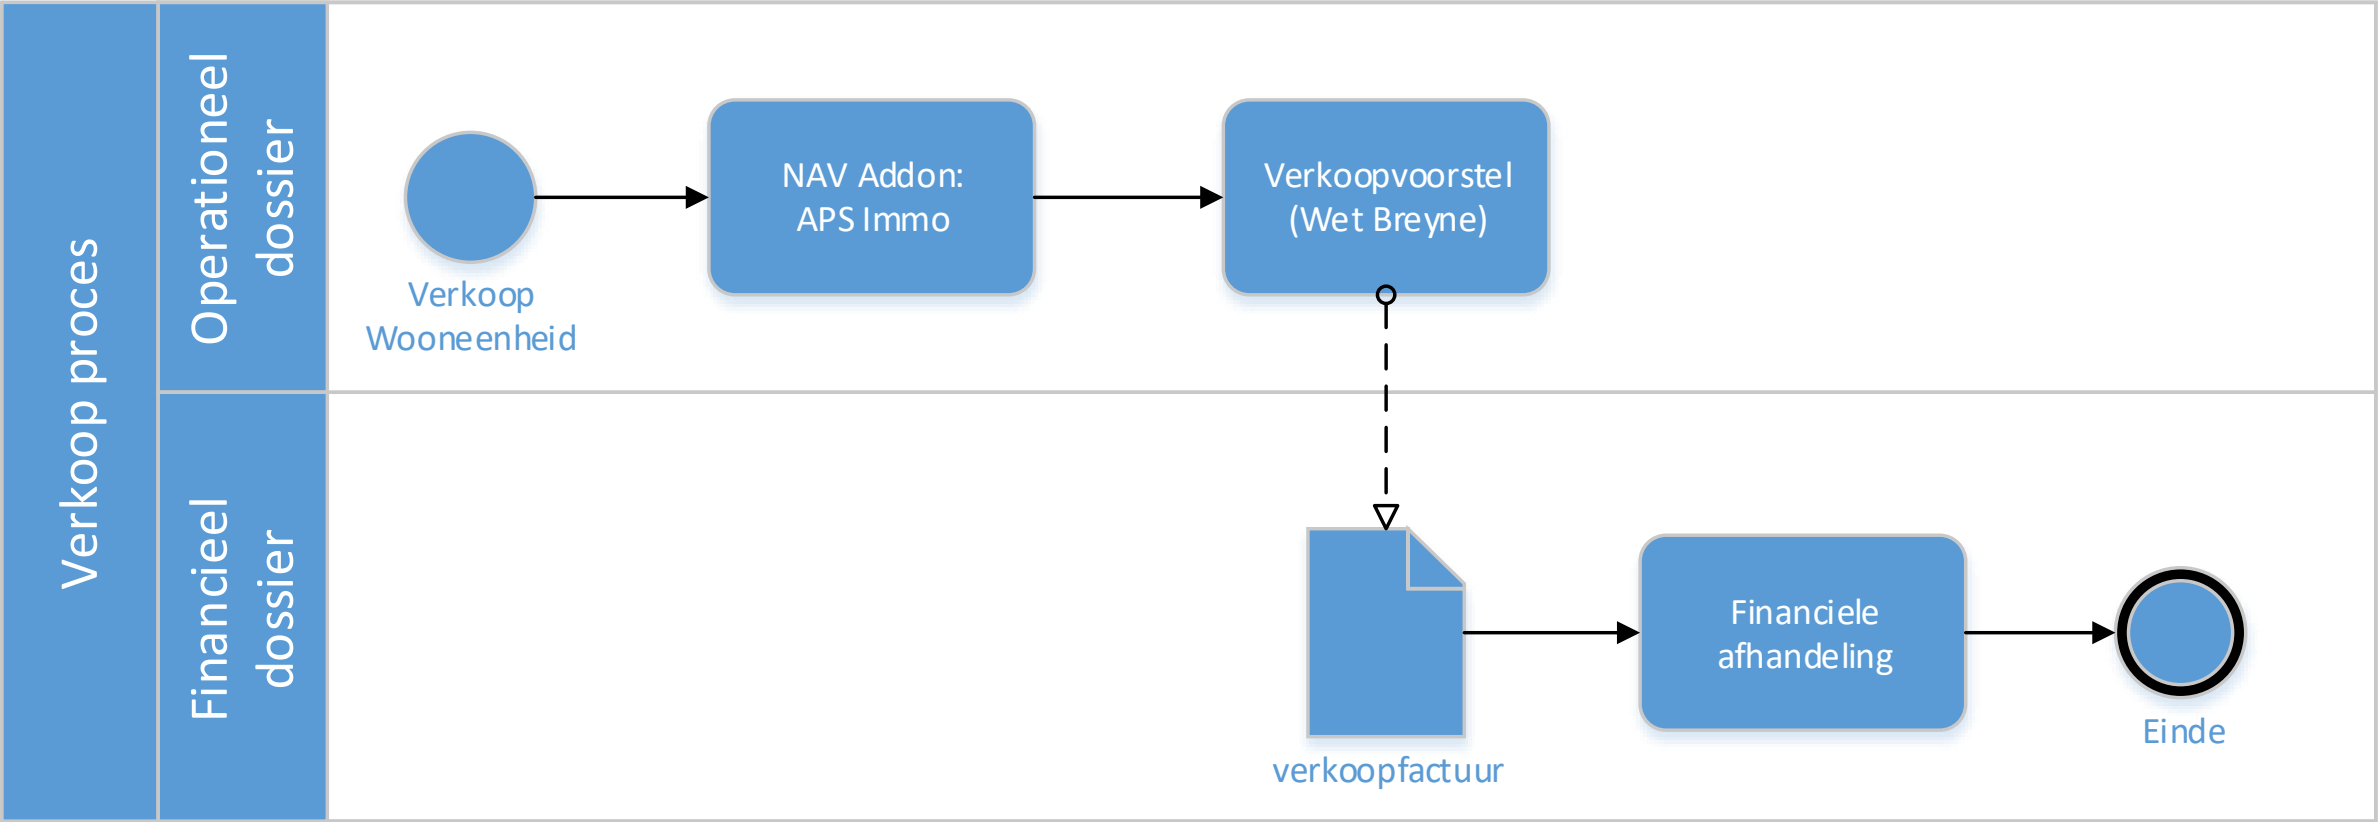

Purchase invoices will be posted in the right Financial company and linked to the project, contracts and Progress statement in the operational company.

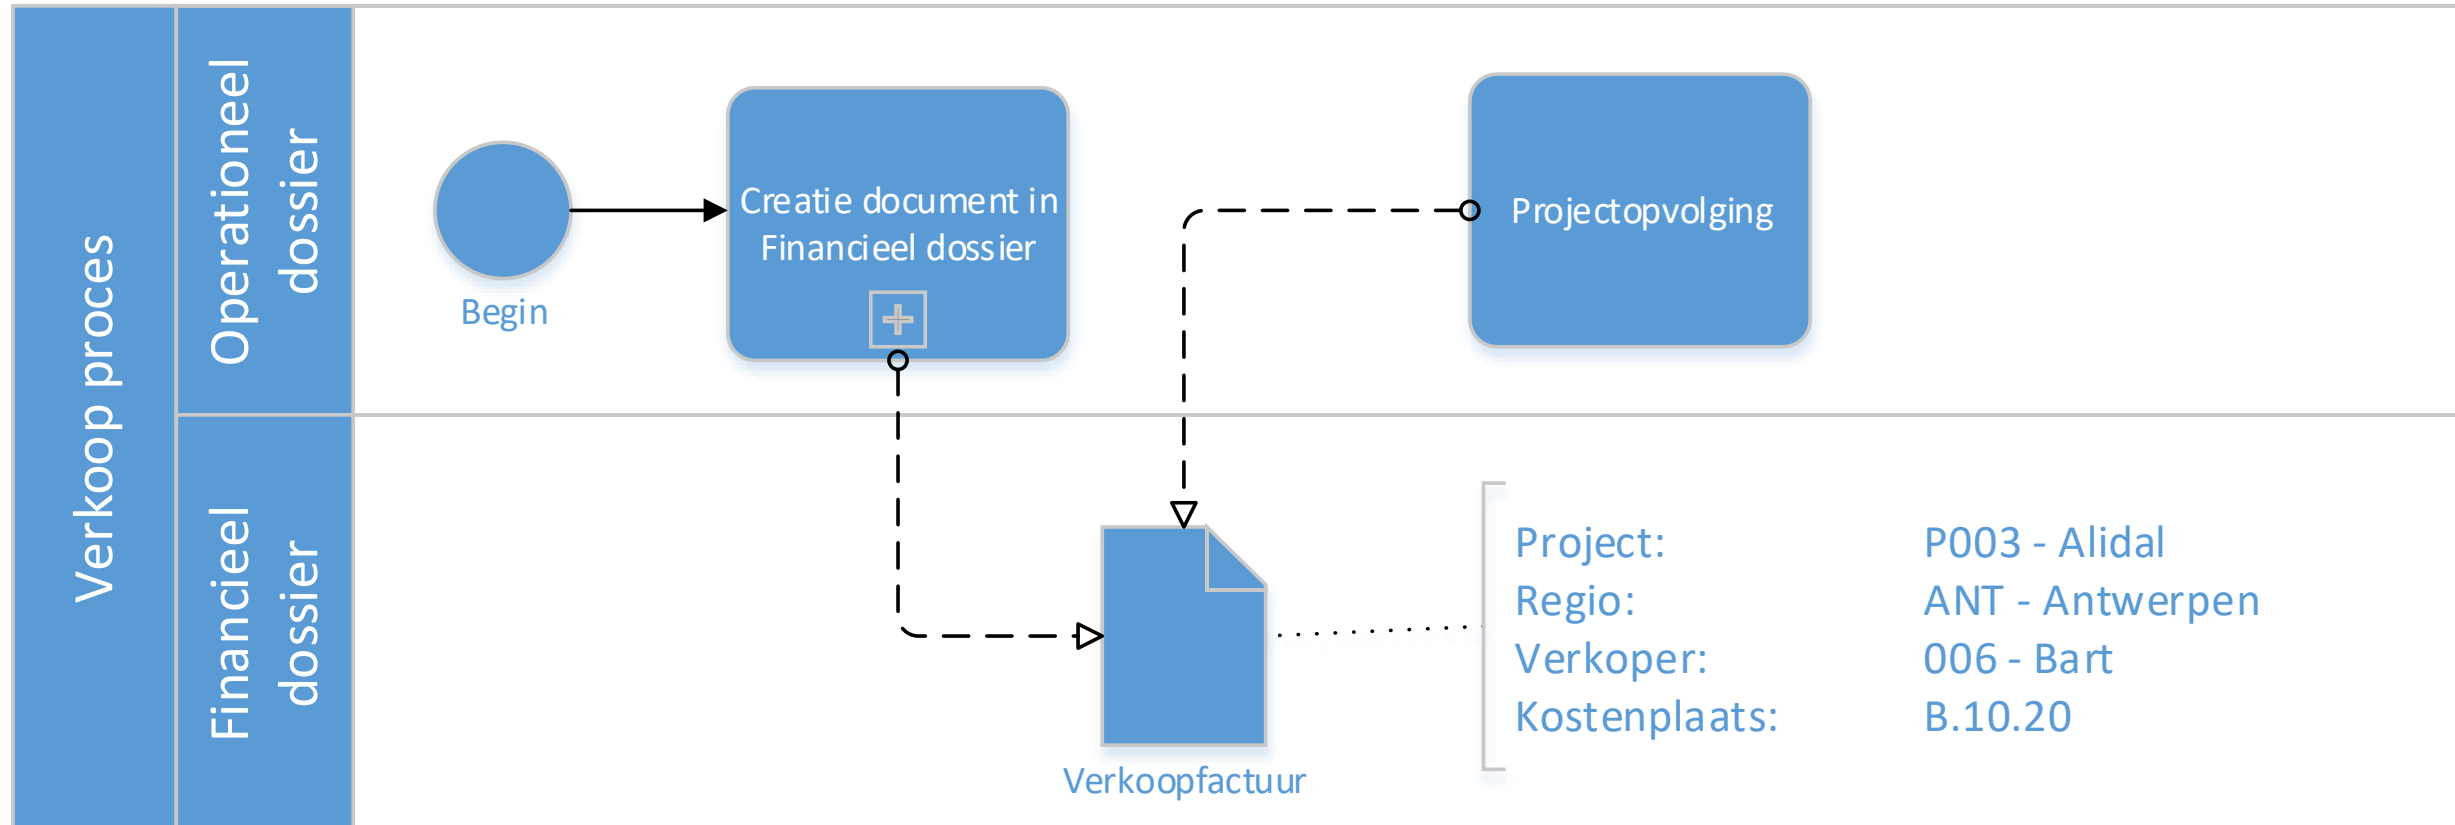

Sales invoices will be posted in the right Financial company and linked to the project, units and customers in the operational company.

Analytical codes (dimensions) + Dimension values will be synchronized over all dossiers, so that each dossier will use the same analytical codes.
Example: we will get data from the Financial company by using the analytical code 'Project' and will use this date in the operational company to make the necessary reports (eg. cash flow analysiss)
