Smart software
for the construction
industry

Digitalisation is simplicity

4PS develops, implements and maintains software for Construction, M&E, Specialist Subcontractors, Civil Engineering, Service and Maintenance, Plant and Housebuilding companies. 4PS Construct software is known for simplicity and clarity. More than 600 businesses across the world benefit from 4PS Construct.

Applicable to every project. Enter your data only once. Entire document flow for your whole organisation is digitised. Total and complete online management. Available on laptop, tablet or mobile phone. With real-time insight and 100% control. Throughout the world. Is that not what everyone wants?

Suitable for all of your core processes

4PS Construct, based on the Microsoft Dynamics 365 Business Central/NAV platform, supports all your core processes including CRM and Sales, Estimating, Finance, Planning, Project Control, Procurement, Materials and Service & Maintenance. You automatically benefit from the latest technology and industry best practice at your fingertips. Thanks to many years of construction industry experience, 4PS has developed standard functionality to meet specific client requirements. There has never been a better time to embrace 4PS Construct and take advantage of the integrated solution for all of your company processes.

Integrate your BIM model in your company processes

Both you and your partners in the supply chain work with BIM. How do you ensure that all of the different data is integrated in your company processes? Easy. Via 4PS Construct, you enter your BIM model only once and then use it in all of your projects. This innovation ensures a reduction in costs, efficient operations and optimum building management due to predictable maintenance.

What is your benefit? Higher profits!

Thanks to 4PS software, you optimise interaction with your supply chain partners and clients. Make better estimates and calculations for labour and materials. With a simple click gain control of all of your projects and company processes. In short, immediate insight, maximum process optimisation and higher profits.

Innovation in your company operations

Time for change?

Many successful businesses already enjoy the benefits of 4PS Construct. Companies are looking for innovative partners, that strive to be continually ahead of the times and take the lead against the competition. Because digital transformation is simplification.
