As per the Market Research Analysts forecast, global loan servicing market to grow at a CAGR of 14.19% during the period 2017-2021. According the report, one of the major drivers for this market is to comply with multiple regulations.

In order to cater the growing need of loan processing companies, AllianceTek created a solution, ATLender. ATLender is a scalable SaaS platform for Mortgage Servicers, It gives complete control over the loan origination and loan processing. Mortgage Servicer employees and their clients (borrowers) can collaborate and keep track of the documents digitally. ATLender helps Mortgage Servicers to improve back office efficiency and provide seamless borrower experience.

- ❖ Scalable Solution
- ❖ Custom rules can be created in the system for compliance
- ❖ Borrower panel for easy upload of documents
- ❖ Live interaction between borrower and loan servicer team
- ❖ Calyx integration
- ❖ Mobile ready platform
- ❖ Compatible with BI tools such as Power BI, Looker, Tableau
- ❖ Tracking and reminders for incomplete loan applications for quick loan processing
