

# GDPR Assessment

## Is your company at risk of not being GDPR compliant?

Ever growing threats to personal data have forced governments to enact legislation that sets clear standards for protecting their constituents' information. General Data Protection Regulation (GDPR) is a new regulation that applies to organizations that offer goods and services to people in the European Union, or that collect and analyze personal data tied to EU residents.

## GDPR Assessment

A GDPR Solution Assessment provides you with a comprehensive analysis of your data management infrastructure. Ensuring that you have the right processes in place to minimize the risk to personal data exposure, freeing you to focus on your business instead of compliance<sup>1</sup>.

## Benefits

- Identify how personal data is used and accessed
- Recommend security controls to prevent, detect, and respond to vulnerabilities and data breaches
- Provides guidance on data management practices

Facebook and Google hit with **\$8.8 billion** in lawsuits on day one of GDPR <sup>2</sup>

## What to expect from a SAM Assessment

Every assessment focuses on four phases:

### PLANNING

Identify your needs & goals  
Gather information on your IT landscape & business organization  
Discuss project and arrange access & resources

### DATA COLLECTION

Take inventory of hardware and software using automated tools, questionnaires, and interviews  
Gather information on process & procedures

### DATA ANALYSIS

Review & validate all collected data  
Compare deployed assets with current utilization  
Map to an optimized environment based on your goals

### FINAL RECOMMENDATIONS

Discuss final recommendations and engage in data-driven discussions to ensure your business needs & goals are met
