# ABOUT EXSION

---

**With Exsion Reporting you can retrieve data from Microsoft Dynamics Business Central and NAV directly in Excel. Even if you work with an industry-based solution. Exsion Reporting doesn't need Dynamics licenses to fully communicate with the Dynamics database.**

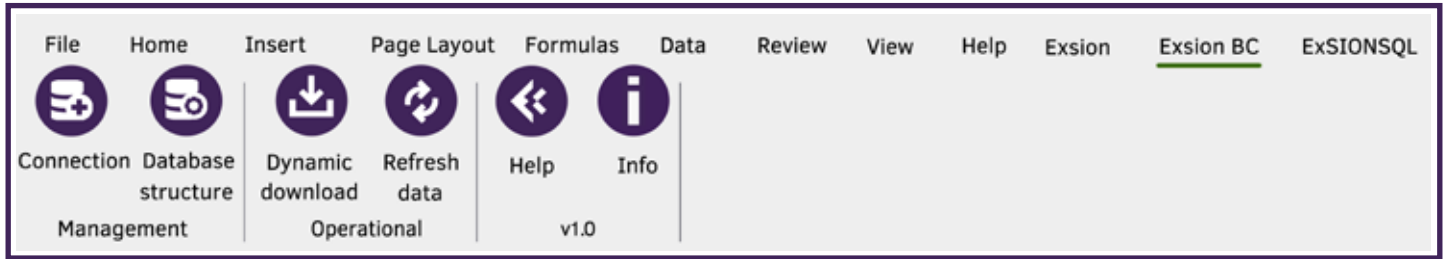

## **Now You Only Need One Solution**

Contrary to many reporting and BI tools that run separately from your Microsoft Dynamics BC solution, Exsion Reporting is integrated directly in BC. All management information and reporting originates from one application. Exsion Reporting for BC/NAV is added to your Excel environment, enabling you to create a wide range of reports with a single mouse click, in the way you are used to in Excel. This will provide you with management data that helps you on all levels: From marketing to logistics. As of now, you really only need one solution.

## **Help Eliminate User Errors**

In Exsion Reporting, you only have to create reports once, afterwards Exsion will provide them to you when needed, time and time again. You can easily create reports yourself, you no longer need a consultant when changes need to be made. Play with data: perform interactive analyses and retrieve management data with a single mouse click. You have direct insight into profit margins and other current data, enabling you to make quick and decisive decisions. Since cutting and pasting is no longer required, user errors are reduced to a minimum. Therefore, you will always be sure that your information is accurate.

## EXSION REPORTING FREE TRIAL LICENSE

You have to see it with your own eyes. Request a free trial license now and try our software for 30 days, in your own work environment. Discover how easily and completely

Exsion Reporting works. If you are not smitten after 30 days, you are not committed to anything and will pay nothing. The installation of the trial license is free of charge.

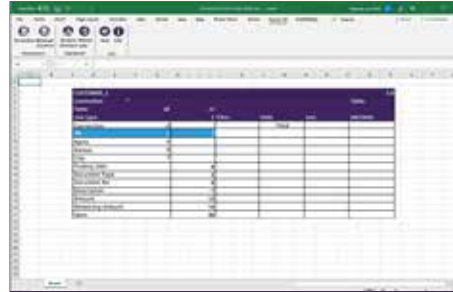

**Easy Data Selection Wizard**

Exsion BC has a simple and straightforward data selection wizard. The Exsion Reporting BC tables and fields are listed on the left. When you want to use a given data field, simply click it and it will move to the right. You can create joins between tables, as well as choose data used in an Extension.

**Make Exsion work for you**

Rapidly generate the reports you need. Exsion combines all Microsoft Dynamics data and can create any report you desire. From at-a-glance overviews for management to a full-fledged consolidation.

**Dynamic Download**  
Easy Data Filtering

Your chosen fields are listed in the Dynamics Download. Here you can add additional filters, for example, a data range, name or specific customer.

**Simple Data Generation**  
Over and over Again

Click the Refresh button and your report will be filled with the most recent data!

## EXSION REPORTING for Microsoft Dynamics 365 Business Central

This Exsion version is our first step into Microsoft's cloud world. You can use the app to create management reports, as well as simple lists in Excel.

We closely follow Microsoft Dynamics 365 Business Central developments, and continue to improve the techniques we use. We aim to enrich Exsion Reporting BC with new functionality in the near future. In the meantime, we will also ensure proper functioning of Exsion in on-premise client implementations.

## PAIN

- I cannot retrieve data from Dynamics Business Central
- I cannot make a selection of data
- I have to use cut and paste to get things right
- I can only access the General Ledger table
- To change a report, I have to hire expensive consultants
- Data generation takes forever
- If I ask for help, the answer never comes or is always late
- I cannot access data generated by Extensions
- The installation of the software is complex, time-consuming and error-prone

## BENEFIT

- With Exsion, you can easily export data you have selected into Excel
- The download enables you to select data
- After performing a download, you only have to press the Refresh button
- With Exsion, you can select and download all data
- With Exsion, you can create reports after a one-day training course
- Exsion provides quick answers
- If you call our helpdesk, you will get an answer immediately
- Exsion can also read and retrieve these data
- Exsion is an App Source extension, you will need an Excel add-in, that is easy to install
