Using the Online Planner is complicated

Challenges

- Many tasks are initiated from mails we receive. Creating a Planner tasks from an email is just so complicated
- We often need to attached file we receive by mail to tasks. Both new and existing tasks that we work on
- Having many tool for tasks management

Hill Association

Increasing productivity from Outlook

We have been using iPlanner Pro for the past year and are very pleased with this app. We like using it from Outlook and are using it daily. The ability to easily customize each task, adding team members and attaching documents works perfectly for my business which is project driven. We do a lot work on projects with long lead times that involve multiple people within our organization. I would recommend using this app!

—Larry Hill, CEO, Hill Association

Great Add-on!!! With this app, all my team saves a lot of time creating tasks based on email content. Any issues send by email from my clients, it can be converted in an iplanner task with a few clicks. Congrats!

- Jose Nuno Braga

Great!! The best in productivity for Outlook. It is definitely the best application that exists for outlook of everything I've tried. It is simple, fast and clear. You can add new tasks in real time and edit the fields from outlook with the information of your groups because it is connected. The option to add email attachments is fantastic.

- Carlos Cuesta

iPlanner Pro is a very interesting app, that helps you initiate tasks in Microsoft planner directly through Outlook app. This is very useful and handy for those of us who like to assign and follow tasks directly through the mail.

- Zvezdan Ilic

Great ! The program works great, especially if you want to have your mail and Planner in one place. Very quickly connects with your plans. Adding more tasks is not a problem. I highly recommend it.

- Oliwier Brewko

Use daily for O365 BI and ISO. We are using O365 and all its' goodies like SharePoint; Teams; OneNote; Planner and of course Outlook. No need to flag emails or create tasks with this brilliant add on from emails to Planner - excellent tool in our ISO mapping! Highly recommended!

- Susanne Shi - Business Intelligence Officer
