

The most advanced Human Resources Management  
Software built on Microsoft Dynamics 365

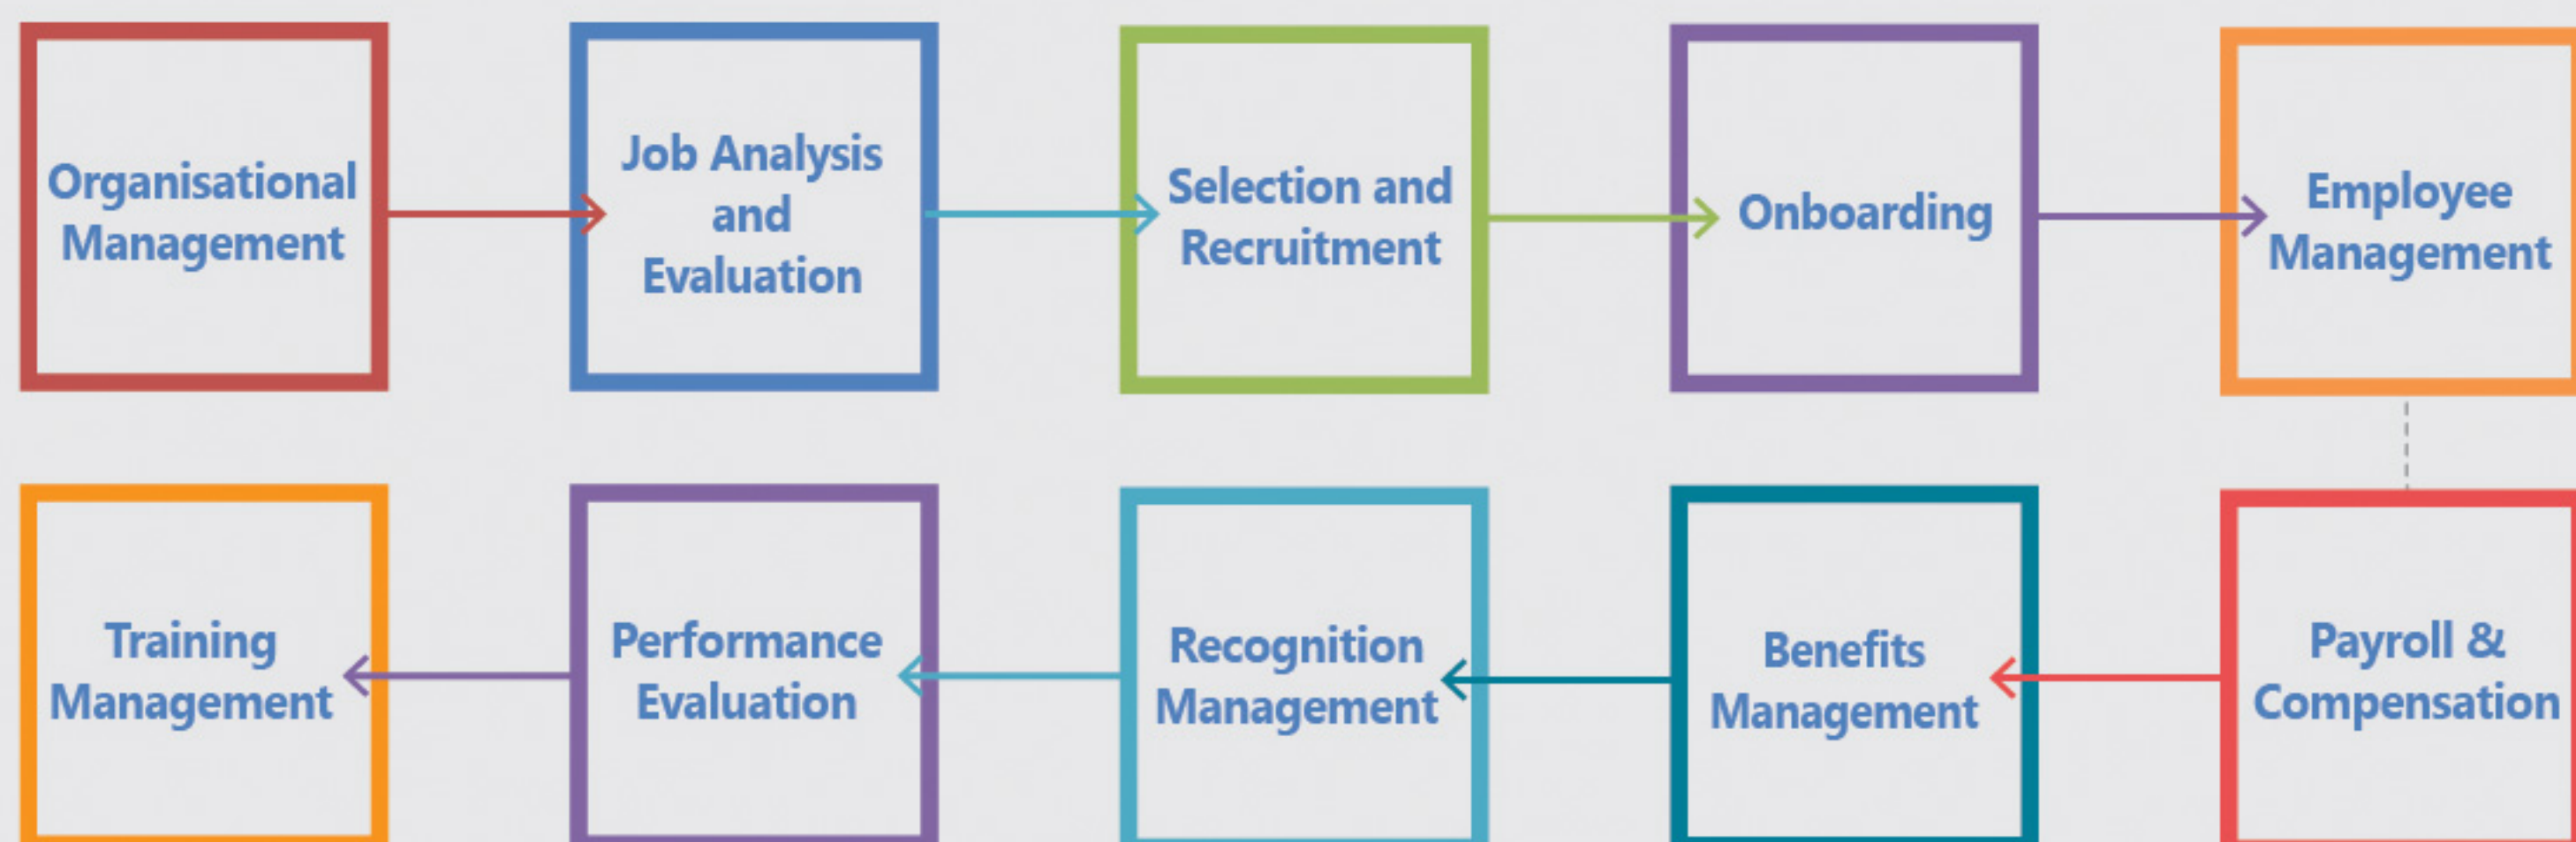

HumanSoft is an end-to-end Human Resources Management software developed solely using the xRM features of Microsoft Dynamics 365 platform. Thanks to the flexible process management offered by the platform, your company HR processes can be quickly adopted.

## HumanSoft Modules

Microsoft Dynamics 365

## HumanSoft Employee Cycle

## Featured Modules of HumanSoft

### Onboarding / Recruitment Processes

Organise all hiring and onboarding processes and include all relevant departments or persons:

- Create dynamic workflows for employment procedures
- Gather onboarding paperwork electronically
- Ensure employee benefits are granted by the relevant department
- Create and update records automatically on Active Directory

### Mobile Access / Self Service HR

Launch and approve HumanSoft processes right from your mobile device. Key operations you can perform:

- Edit your personal details
- Enter or approve leave requests
- Enter or approve training requests
- Construct any approved flow

### MyHR Portal / Self Service HR

Using the MyHR Portal, employees can perform permission-based tasks, relieving HR from unnecessary operational burden. This will give HR the time for high level functions.

- Display/update employee details
- Create and approve leave/training requests
- Evaluate employee performance
- Access company documents and other information

### Recognition / Rewarding Management

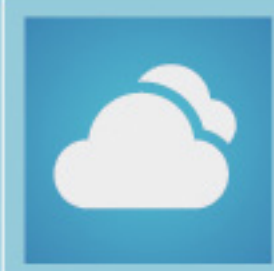

Score and reward your employees for their activities either directly or indirectly related to human resources:

- Define scoring rules
- Display scores and rewards attained
- Construct approval flow logic for rewards
- Display rewards related to bonuses

#### Customisable

Microsoft's most flexible application platform can be customised to adapt to your processes.

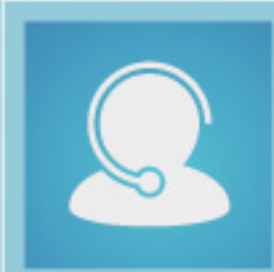

#### Cloud Option

We offer affordable leasing options for your own cloud platform or Microsoft's cloud platform.

#### Modular Infrastructure

Use the modules you want based on your budget.

#### Process Consultancy

We help you adapt the system to your HR processes for a complete and long-lasting solution.

## Our Other Solutions

### Portals for Dynamics 365

xRMLink is a flexible and customizable portal solution running on Microsoft's Azure Cloud platform. Configure a full function portal with no programming required. xRMLink can extend your Dynamics CRM (v2011 – 365) to any outside stakeholders. This allows you to easily include your customers and/or partners into your business processes in a controlled, secure way. Get set up and running in 1 to 3 days.

### Pension Management Software

With PensionSoft you can manage your customers' pensions with ease. Built on the Microsoft Dynamics 365 platform, PensionSoft gives you the power and customizability to drive all your pension management processes.
