

DATA SHEET

Shipping with Pacejet

The Pacejet software platform helps you transform shipping from a business necessity into a competitive advantage.

Put the science of enterprise shipping to work with Pacejet, data-driven shipping software that helps you evolve, adapt, and improve as your business grows.

Offering shipping solutions that give you an edge.

- Many carriers and modes in one with freight, parcel, 3PL shipping together using a single user interface and workflow.
- 360 degree view of shipping with reporting for all carriers, shipments, and modes in one complete database with automatic ShipOptics™ reports to monitor key metrics.
- Built-for-cloud technology, Pacejet provides easy provisioning for multiple locations, continuous upgrades, elastic capacity, and no expensive software or complicated hardware configurations.
- Carrier connectivity enables your ERP system to transact with shipping carriers in real-time and provides agility to add, upgrade, or change carriers as your business grows.
- Native ERP integration supports shipping workflows that run seamlessly with ERP systems, using a RESTful API for interactive, event-driven, and asynchronous processing.
- Freight quoting features empower teams and websites with accurate detail on lowest costs and fastest shipping methods.
- Packing and load management features improve customer compliance, automate paperwork and labels, and support EDI.
- Financial management to oversee shipment pricing, capture costs, charge third parties, invoice freight, and audit carrier invoices.

Business benefits

Reduce rates up to 30%

Automatically rate shop across more carriers to find the best price for shipments.

Reduce labor up to 80%

Automate workflows and integrate carriers with your ERP to reduce manual steps.

Grow sales with speed, accuracy, and service

Choose faster transit times, validate items and quantities, and comply with customer rules.

Pacejet pays for itself

Generate enough savings to pay for a year's subscription in as little as 1-2 months.
