

FOODWARE 365

PRODUCTION BATCH SIZES

Do you produce in standard batch sizes? Do you make use of kettles or limited bins? Foodware 365 helps you to optimize your production batches with the Production Batch Sizes app.

Optimize your recipe to maximize your kettle's capacity

The standard Microsoft Dynamics 365 Business Central Production BOM is extended to handle batch sizes. Simply mark the component lines that add to the batch and Foodware 365 calculates the expected batch size for you. Adjust the quantities to maximize the use of your kettles capacity. The app is fully compliant with standard Business Central Processes, so functionalities like scrap or phantom BOMs are still available and working.

Produce more efficiently in full batches

Foodware 365 takes the batch size information along to the production order. When creating a production order, Foodware 365 shows you the suggested number of full batches including the required output quantity. Simply changing the output quantity results in a production order based on full efficient batches.

Simplify registering consumption

Foodware 365 breaks down the consumption list to a batch size level. Not only does it show the complete consumption quantity for the whole production order in the consumption line, but also the exact quantity that should be added to the kettle by the operator for a batch. By giving these details and executing the calculation for your employees, we minimize chances for mistakes.

Features and benefits

- Batch calculation in recipes
- Suggest output quantity to maximize kettle used
- Consumption calculation per batch
- Possibility to register Non-Conformances on a Customer or Consumer level
- Anytime, anywhere, any device

About Foodware 365

Foodware 365 is the foremost food solution based on Microsoft Dynamics 365. Following years of experience and leveraging the feedback from thousands of users, Foodware 365 is the next generation of business apps for food companies running Dynamics 365, both Finance & Operations and Business Central. Even more, Foodware 365 goes beyond the business applications, aiming to leverage the full suite of the Microsoft platform including Office 365, the Microsoft Power Platform and numerous Microsoft Azure Services. Thanks to our modular approach, food companies have full flexibility with regards to the apps their organization needs.
