

As a business owner, you probably **spend a large portion of your day reordering product or calculating how much to order**. And when you do, you probably wonder if you ordered too much or too little, if you are spending too much time or if there is a better way to do this very important task.

What if we told you there IS A BETTER WAY? Live Connexus has created an app for Microsoft Dynamics 365 Business Central that automates your reordering calculations and optimizes your Purchase Orders by vendor. This tool was designed by a team of inventory planning experts, (CPIMS, Industrial Engineers, Program analysts, and Statisticians) who have put together the best inventory planning concepts from the American Production and Inventory Control Society (APICS). These experts, sum over 50 years of practical experience in inventory management for both in large multinational companies as well as small retail businesses.

Simple Reordering

Reduce your time spent creating Request for Quotes or Purchases Orders. The AIM app will consolidate them by supplier and send them.

Improve Customer Service & Sales

Reduce product shortages with a more accurate forecast that protects you against unexpected changes in demand.

Reduce Inventory Costs

Have peace of mind with a self-learning forecast, that adjusts as your demand increases or decreases and avoids inventory excess.

Better Inventory Visibility

Add better reports and tools to measure your inventory levels vs. your customer demand.

Easy Setup

Answer a few questions, and you can have the app running. No need to hire a consultant or run complicated formulas.

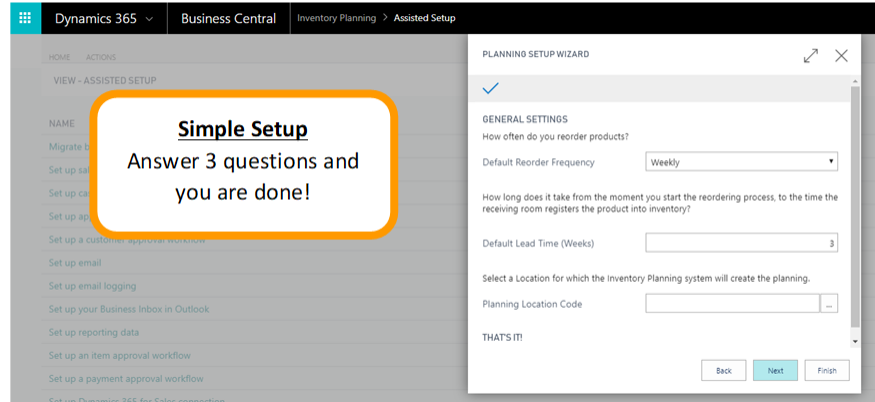

Flexible

Adjust the tool to meet your specific business requirements.

Easy Setup

Choose between the Basic and the Advanced Setup. Configuring our application takes less than 1 minute and requires little knowledge on Inventory Planning terms.

Choose the **Advanced Setup** for enhanced controls like Safety Stock, Order Cost or Carrying Costs.

Annotations:

- Choose daily or weekly (points to Reorder Frequency dropdown)
- Reorder Frequency: Weekly
- Time Bucket
- Split orders by multiple vendors (points to Vendor No. 1 and 2 columns)
- Automates Reorder calculations (points to the table)

Run your demand calculations inside Dynamics 365 Business Central, select multiple vendors, determine your Order quantities in seconds and create your Purchase Orders.

Have the power to generate all your Quotes and Purchase Orders with one click! Imagine all the time you will save.

Better Inventory Visibility

Access item data directly from the Planning Card, to make informed decisions and adjust your order quantities. Also enter Links or Notes on your Planning card for future review.
