VerityStream™ for Urgent Care Clinics

Easily Privilege Providers and Credential your Urgent Care Facilities with VerityStream

Urgent Care Clinics are reducing barriers to care and delivering better outcomes at a lower cost. Demand for Urgent Care is at an all-time high, but exponential growth has resulted in decreased payer reimbursements and stricter industry regulations.

You must ensure that your patients receive competent care at qualified facilities from capable caregivers.

The key is automation, with VerityStream's:

> Industry's leading automated privileging and credentialing solution

> Comprehensive library of delineated privileges for more than 100 adult and pediatric specialties

> Health plan credentialing requirement monitoring

Get VerityStream, and get a single system – built around the best content, data, and practices – to manage all your privileging and credentialing needs.
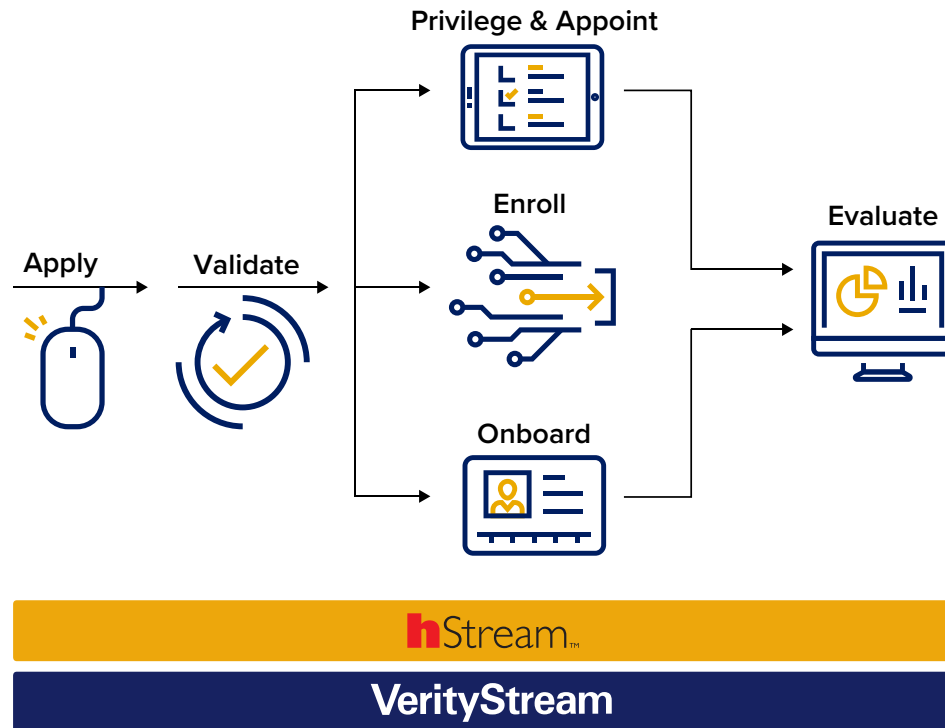

VerityStream for Urgent Care Clinics

Verify and monitor privileges, licensure, certification, education, and more for:

> Physicians, Physician Assistants

> Nurse Practitioners, Registered Nurses

> Medical Assistants

> Radiologic Technicians, and others

Verify and monitor compliance standards set by:

> CMS

> State Departments of Public Health

> TJC, IMQ, and more

VerityStream has you covered with an enterprise-wide, SaaS solution that enables everyone in your organization to collaboratively manage the entire provider lifecycle.

hStream™

VerityStream

Apply
Bring the application process – configured to your specific needs – online and allow your providers to digitally add and update their own data.

Validate
Verify and monitor licensure, accreditation, certification, affiliation, sanctions, exclusions, disciplinary actions, malpractice claims, Medicare/Medicaid Opt In/Opt Out, education, training, and professional references.

Privilege & Appoint
Privilege automates and standardizes privilege granting and evaluation with an industry-leading, library of delineated privileges while Appoint ensures reviewer clarity with a centralized view of validated provider files.

Enroll
Manage, accelerate, and automate the process of requesting provider participation in health insurance networks with thousands of pre-formatted forms that populate in seconds, including forms from CAQH, PECOS, Medicaid and more.

Onboard
Create a one-stop shop for managing and tracking activities and events throughout the Provider onboarding process including Employee Health, Malpractice Insurance Underwriting, EMR credentials, Required Learning, etc.

Evaluate
Automate the process of managing provider competencies to improve the quality of care delivered. Offers a holistic view of provider performance as well as insight into specific data points included in composite scores.
