

e platform that allows sational & Skills Bot.

By providing a simple and intuitive platform that allows any user to create a Multi-Conversational & Skills Bot.

BIA will allow you create a collection of questions and answers that will reduce the time to search for information and interact with your internal systems.

HOW?

BENEFITS

EFFICIENCY

Quickly and efficiently answer simple questions using natural language. Learn and answer questions, reducing time in preparing information.

COST REDUCTION

By optimizing processes and operations, reduce costs and increase the satisfaction of decision makers.

TIME OTIMIZATION

BIA can respond to multiple users at the same time and in real time, freeing teams for more creative and complex tasks.

AUTONOMY

BIA can learn autonomously from new data, making the model increasingly efficient and improving interaction with humans.

EASE OF ACCESS

Available on your desktop or mobile phone anytime and anywhere. BIA speaks several languages and responds in real time.

AUTOMATE TASKS

BIA is prepared and available to meet your business needs reliably and accurately.

SECURITY

Your data is safe as it is not copied to BIA, always keeping the same source.

SIMPLE AND INTUTIVE

Search is done in real time and orally in a simple and intuitive way. BIA is available 24 hours a day, 7 days a week.

IMPROVED DECISION - MAKING

Faster access to key information with centralized, unified Management for a direct impact on your strategic decisions.
