

Datagate for Telecom Billing

Automated, Integrated Telecom Billing for MSPs !

Why are MSPs selling Telecom Services?

- Phones and computers have converged.
- Voice and data apps use the same IT infrastructure.
- Reselling voice solutions is easy and profitable.
- Recurring revenue with high margins for the MSP.
- Many business customers prefer to have a single source for IT and telecom services. Their MSP!

What's different about billing Telecom?

- Telecom invoices require pricing plans, bundling and call rating, in addition to recurring charges. This requires integration with telecom providers and PBXs to obtain the call detail records (CDRs).

Built on Azure, Ideal for Microsoft Teams

- Microsoft Teams brings new revenue opportunities through its telecom voice call, or VoIP capabilities.
- Selling VoIP calling is profitable, recurring revenue for MSPs.
- Datagate provides the specialised functionality required for billing and delivering telecom invoices
- Datagate is a powerful, scalable SaaS solution, built on the Microsoft Azure platform and capable of processing the largest telecom billing workloads. Datagate will grow with your business!
