

## ***Commercient SYNC for Epicor 10 and Microsoft Dynamics 365***

Commercient SYNC, the #1 data integration platform integrates your Epicor 10 system with Microsoft Dynamics 365. The Commercient SYNC Agent is rapidly deployable and gives you access to your Epicor 10 customer and order information in Microsoft Dynamics 365. We are compatible with the following editions: Epicor Prophet 21, P21, Epicor Eagle, Epicor 9, Dataworks, DCD, Scala, ROI (Manage2000), and Epicor 10 Cloud Version, Epicor BisTrack, Epicor Eclipse, Epicor Eagle Aftermarket, Epicor CMS, Epicor Vision, Epicor LumberTrack, and Epicor Retail Cloud. Commercient is certified for use on the Microsoft Dynamics 365 mobile platform.

### ***About the SYNC:***

- Unlike traditional data integration tools such as ETL, there is no coding, mapping, or server. We handle everything, so you can focus on growing your business.
- Epicor 10 data is automatically integrated into your Microsoft Dynamics 365 so you don't have to program anything.
- Changes are reflected in Microsoft Dynamics 365 as soon as the records in Epicor 10 are altered.
- Epicor 10 and Microsoft Dynamics 365 are both beneficial since Epicor 10 can reduce overall expenses while Microsoft Dynamics 365 can bring in more revenue through better sales figures and increase profitability.
- Commercient SYNC for Epicor 10 is built by ERP & CRM integration experts.
- Commercient's software provides Epicor 10 users with a "Cloud-based" experience. Since it is a cloud-based experience, you can be ensured that Commercient will have your data secured.
- Any field synced from Epicor 10 can be displayed on the Microsoft

Dynamics 365 screen. All of the data Commerciant SYNCs to Microsoft Dynamics 365 becomes part of Microsoft Dynamics 365 native database. As such, you can perform any Microsoft Dynamics 365 function on the data—from graphing to dashboards to using third-party apps that can make use of the data.

- SYNC has provided a user-friendly search engine in Microsoft Dynamics 365 to lookup data. For instance, search for a serial number and find the Invoice Records and Sales Order records that pertain to it.
- Implementing Commerciant SYNC creates a simple data integration pathway between Epicor 10 and Microsoft Dynamics 365. Our SYNC solution also enables you to prevent the duplicate data, handle custom objects in Microsoft Dynamics 365, and take advantage of the premier support.
- The SYNC app only uploads or updates data as it changes. Commerciant has an eye for detail and has implemented a series of measures in order to track changes as well as, submitting records to Microsoft Dynamics 365 API (Application Programming Interface) in a single call.
- Commerciant can significantly reduce the likelihood of exceeding the Microsoft Dynamics 365 API Epicor 10 limits, as Epicor 10 has a limit of 100 requests per minute per company. In the event that a daily limit is reached (which can occur during the initial SYNC of a large Epicor 10 system) Commerciant will continue to SYNC where it left off on the following day.

### ***What does SYNC offer?***

The first item to be SYNC is your **AR Customer Record** and once this is completed, all the fields can be shown. As you can see below. Customers in Epicor 10 are integrated into Microsoft Dynamics 365. Their Ship To and Bill To address in Epicor 10 is merged into Microsoft Dynamics 365, which can be displayed according to their needs. By clicking on the Epicor 10 Customer Record, you can see all the fields that are synchronized.

**Customer Records**

Customer Name	CREDIT HOLD	CUSTOMER TYPE	CURRENT BALANCE	CREDIT LIMIT	LAST PAYMENT...	DATE LAST...	DATE LAST...
Sandia National Labs	N	HOUS	160,740.00	100,000.00	84,492.30	9/10/2014	9/30/2014

**Open Sales Orders**

SALES ORDE...	Account_R	SALESPE...	ORDER...	ORDER...	ORDER...	CUSTOMER...	BILL TO NAME	WAREH...	NON TAXABLE AMT
1412189	Sandia National Lab	1000	8/6/2014	O	S	SAN	Sandia National L...	100	47,600.00

**Invoices**

INVOICE ...	BILL TO NAME	Account_R	AMOUNT SUBJE...	INVOICE D...	INVOICE DUE D...	INVOICE TY...	PAYMENT T...	CREDIT CARD P...
0243826	Sandia National Labs	Sandia National L	80,370.00	7/28/2014	8/12/2014	IN	---	0.00
0243921	Sandia National Labs	Sandia National L	0.00	7/29/2014	1/1/1900	CM	---	0.00
0248814	Sandia National Labs	Sandia National L	160,740.00	9/30/2014	10/15/2014	IN	---	0.00

**Ship To Address**

SHIP TO NAME	Account_R	SALES PERSON NO	CONTACT CODE	SHIP TO CITY	SHIP TO STATE	CUSTOMER NO
SANDIA NATIONAL LA...	Sandia National Labs	1000	---	ALBUQUERQUE	NM	SAN

Once the Customer Record is in Microsoft Dynamics 365, Commercient then SYNCs the **Sales Orders and their Detail Lines** which relates them to the corresponding Microsoft Dynamics 365 Account record. The Sales Order data and Invoices Sales Order data is merged as one as a custom object into Microsoft Dynamics 365 since each customer's needs are unique. This allows customers to see their invoices that have their orders and details as well as, viewing the different statuses of their sales orders as they change in Epicor 10. Removing canceled Epicor 10 Sales Order data from Microsoft Dynamics 365 has performed automatically.

Commercient has designed the relationships with the data objects in Microsoft Dynamics 365 that can give you the freedom to decide which objects you would like to display on the screen. You are always able to click to other parents- or child-related objects. For example, an Admin user can remove the Sales Orders from the Account screen but leave their Detail Lines. This allows our customers to see what was sold and shipped from the main account screen. By clicking on the Sales Order link on the detail line, they can view the full Sales Order.

# SYNC for Epicor 10 and Microsoft Dynamics 365

- The AR Invoice data is useful for identifying unpaid invoices and locating the data, in which the customer needs to pay for the services used.
- The other records which are used in SYNC include the **AR Customer Ship to Tax Exemptions, Item Master, and Item Warehouse.**
- The **Item Master** is used to create **Microsoft Dynamics 365 Products** by Commercient and links the entire **Item** and **Warehouse** records to the **Product.**
- This gives you the ability to have accurate product data and Inventory availability. In addition, you can **SYNC any Database, table, or view.**

The screenshot displays the 'Active Customer Records' table in Microsoft Dynamics 365. The table includes columns for Customer Name, CREDIT HOLD, CUSTOMER TYPE, CURRENT BALANCE, CREDIT LIMIT, LAST PAYMEN..., DATE LAS..., and DATE LAS... The data rows list various companies such as ZYMARK INC., Zorbit Technologie..., ZORBIE PRODUCTS..., ZIKA GROUP LTD., ZIA CONCRETE SU..., ZEPAK, ZAFF INTERNATIO..., YUWON INTEC LTD, Youngstown Barrel..., YOUNG ENTERPRIS..., YORKSTON OIL, and YANKEE SUPPLY C... The interface also shows a search bar, navigation icons, and a status bar at the bottom indicating '1 - 250 of 2347 (0 selected)'.

Customer Name	CREDIT HOLD	CUSTOMER TYPE	CURRENT BALANCE	CREDIT LIMIT	LAST PAYMEN...	DATE LAS...	DATE LAS...

### ***What if I have an existing Microsoft Dynamics 365 database?***

Clients with existing records in both Epicor 10 and Microsoft Dynamics 365 must consult with the Commerciant Professional Services team to perform a clean-up and match-up of records before the Commerciant SYNC is enabled.

### ***Can I limit or control the data that I SYNC?***

Yes. Commerciant has created an open methodology of allowing you to control the filtering of data in the SQL WHERE statement while maintaining the integrity of relationship mapping and efficient syncing methodologies. Within the WHERE you can perform sub-queries, filters, and cross-table and cross-database sub-queries to affect the rules. In addition, you can also map custom tables or views. (Charges may apply.)

### ***What else does Commerciant do with Microsoft Dynamics 365?***

Data synchronization is the first step towards a total solution. Ask about these additional modules for Epicor 10;

- Quote Processing;
- Web-based Product Configurator;
- Opportunity and Quote -> Sales Order Conversion;
- Products and Price Book SYNC;
- Product Record Types;
- Cases with Serial Numbers Invoiced and Service Orders;
- Opportunity Commissions Calculations based on Epicor 10 Invoices;
- Automatic Epicor 10 Sales Order Email Engine;
- Automatic Invoice Email Engine;

- Dealer/Wholesaler Self-Service Portal;
- Custom Data synchronization; and
- SF Account Conversion to Epicor 10 AR Customer.

### ***System Requirements:***

Microsoft Dynamics 365 Group, Professional, Enterprise editions or higher.  
Microsoft Dynamics 365 API is included at no charge.

### ***Company Information:***

Commerciant is a cloud-based company that connects Microsoft Dynamics 365 directly to your Epicor 10 system. Our open SYNC Agent works with ERP's such as Epicor, SYSPRO, Traverse, and other ERP accounting systems. Commerciant improves the efficiency of getting CRM, B2B, and B2C eCommerce orders directly into your accounting system in real-time, with all of the associated business rules.
