<u>Simple AI scan</u>

The simple AI scan reads automatically all relevant data from invoices, creditmemos and receipts with the highest available accuracy on the market. For this purpose we use the newest knowledge within AI to make machine learning models, which we improve continuously. Our AI scan does not require templates, training or maintenance and we reads all data from vendor information to payment information.

<u>Validated AI scan</u>
The validated AI scan provides full automation of the your workflow and the highest available data quality. Neither Humans or technology are separately 100 percent reliable, but together we are nearly perfect. With the validated scab, our team ensures, that your data are correct through debugging. In the same time we will train and improve the scanning engine ongoing.
