An All-In-One Solution To Help Social Benefit Organizations Better Serve Their Community

“Sparkrock 365 is going to give us the access, efficiency, and reporting functions we need to enable our staff and better support students, teachers, and our wider community.” Halton District School Board

• SITUATION

With 93 schools serving more than 64,000 students and 6000 staff, Halton District School Board is part of a large and fast growing community. The organization was using multiple point solutions, which did not all integrate effectively. They were relying on manual processes and struggled with siloed data and departments. This made Ministry reporting a struggle, and data-informed decision making impossible.

• SOLUTION

Halton District School Board chose Sparkrock 365 for its all-in-one solution which gives them access to all their data at a single source. Improved access reduces administrative bottlenecks, while the better reporting and real-time data will both save time and improve their ability to make informed decisions for the better of their community.

• BENEFITS

Modern true cloud ERP application provides stability and high performance to school boards.

Advanced dashboards and reporting provides school board with up to date information.

Seamless, connected data from human resources to accounting saving time while sharing data.
