360˚ Asset and Equipment Register

Instant visibility and springboard for all functions from maintenance to contract allocation

Key Benefits include:

- Save time by managing several assets at the same time
- Instant visibility of all assets through hierarchical views and associated information including history
- Save costs by using one solution for all asset types and industries such as mining, fleet, facilities and manufacturing
- Manage more effectively by real time monitoring of revenue and cost
- Better utilisation of company resources
- Complete life cycle cost management

Single-point visibility

One central point to manage, operate, control and optimise the entire asset or equipment fleet
