Auto-scaling has never been easier with PowerScalr:

Save money

Pay ONLY for what you use. We leverage Microsoft's 'by the minute' billing capacities by monitoring and reacting in real-time. Plus, there is no up-front cost - you'll only be billed once you start saving.

Set it and forget it!

Our scheduling feature gives you the freedom to decide when to use a higher power tier. Once your schedule is set, PowerScalr will keep working behind the scenes to save you money!

Auto-scale with ease

PowerScalr allows anyone to easily leverage auto-scaling. There's no complicated scripts or coding knowledge necessary.

**No up front costs. No long term contracts.
No termination fees.**

Try it today and see how much you could already be saving!
