

FOODWARE 365

ADVANCED ATTRIBUTES

Perfect your analytics and manage your company better than before. By adding the possibility to configure attributes for vendors, customers and lot numbers, getting insights has never been easier. Set up an unlimited number of attributes to organize your data. The attributes are available in list views and fact boxes to quickly show you the necessary information in order to help you make the right decisions. Furthermore, you are able to use the attributes in your Microsoft Power BI solution to analyze your data even further.

How to get clear insight from big data?

With the use of attributes on customer, vendor and lot level you are now able to aggregate data to a level that suits you and your company the best. Set up attributes on a level and create groups to simplify reporting, making sure it has the maximal value and help you and your management in making decisions based on correct and clear data.

Is that specific lot number suitable for my high demanding customer?

By making use of lot attributes, Foodware 365 helps you in making sure the right product reaches your ever more demanding customer. By setting up default values and updating them during the processes, like quality checks, you will always have insights on the current status of a lot number.

Add attributes to pages for informational purposes

With Foodware 365 Advanced Attributes you are able to promote item, customer, vendor and lot attributes to their corresponding list pages. The promoted attributes are shown in the list pages so you can search and filter them, helping you out to find the desired record, or set of records. Do you need a quick list of retail customers, just configure the attribute and off you go!

Gain insight of your items, customers, vendors and lot numbers today!

Make use of the functionality Foodware 365 Advanced Attributes and configure groups, assign them to your items, customers, vendors and lot numbers and start easy searching, filtering and reporting!

Features and benefits:

- Create your own Customer, Vendor and Lot Attributes
- Filter and search attributes in list pages
- Aggregate data for valuable & clear reporting
- Group item, customers, vendor and lot numbers
- Differentiate lot numbers by assigning attributes
