

Introducing the Workplace Modernization Assessment

Make your business application better. Simplify cloud adoption and reduce risk with visibility into your desktops and on-premises environment, helping you improve end user productivity.

With the Workplace Modernization Assessment we take a four-phased approach to set your path forward

Assess & Discover

Gather accurate data from your IT environment

Plan & Decide

Determine what changes are top priority

Migrate

Develop a roadmap for your organization's cloud journey

Optimize

Gain a partner to help you measure your progress over time

of CIOs will complete infrastructure and application re-platforming, using cloud, mobile, and devops by 2019¹
