## PMO AND GOVERNANCE

Support, govern and report your projects and transformation delivery

- Business cases management
- Delivery oversight
- Interactive reporting and dashboards

## BENEFITS MANAGEMENT

Integrate benefits into the overall delivery performance management

- Assure strategic alignment
- Validate deliverables benefits
- Manage benefits lifecycle
- Focus on outcomes

## STAKEHOLDERS MANAGEMENT

Alignment of stakeholders across the organization and externally

- A holistic view which enables numerous project reviews that support the transformation sponsor to engage stakeholders and manage the relationship systematically and consistently

## SCHEDULE MANAGEMENT

Drive projects success through planning standardization and just-in-time reporting

- Report your actual progress vs. Planned using a combination of efforts based and duration based approaches
- Project tasks & work overview dashboard

## RISKS AND ISSUES MANAGEMENT

Actively manage risks and issues across multiple delivery levels.

- Holistic governance of risks and issues
- Utilize better quality data for decision making
- Enable confident and successful initiatives delivery through proactive risks and issues management

## CHANGE CONTROL

Overall control of changes across the delivery lifecycle

- Govern changes evaluation & approval
- Evaluate impact on cost, duration, interdependencies, and scope
- Monitor changes implementation
- Report program level & project level changes

## RESOURCES MANAGEMENT

Adequate staff and material scheduling to assure resource availability and work capacity

- Manage and report resources allocation across multiple projects
- Improving efficiency and productivity through managing talent and optimizing the assignment process.

## PROCUREMENT AND CONTRACT MANAGEMENT

Get the most out of your suppliers

- Align vendor controls with transformation delivery
- Utilize the best methods for identifying potential vendor risks
- Identify high-risk vendors based on current and historical data
- Perform central oversight supported by metrics and alerts

## FINANCE AND COST MANAGEMENT

Gain operational efficiency with better cost control

- Overview of the periodic and total costs of the project.
- Monitor estimates and define the cost of each work package or activity
- Management of all changes to the cost baseline

## KNOWLEDGE MANAGEMENT

Enable knowledge sharing and project documents management in a systematic manner

- Central repository of project start-up forms and templates
- Version control over project documentation
- Lessons learned repository

## QUALITY MANAGEMENT

Ensure that project outputs, program benefits, and the processes by which they are delivered, meet requirements and are fit-for-purpose

- Facilitate quality planning and enable continues improvement
- Report and manage non compliance
- Manage and report project audits

Increase user productivity and accelerate adoption with an intuitive web user interface that users can easily personalize to work the way they do.
