

Extended Field Service Time Card Module

Quickly and easily create, manage, and integrate technician time cards in Microsoft Dynamics 365 for Field Service

Microsoft Dynamics 365 for Field Service is helping many field service organizations automate and streamline processes to support growing service as a profit center. To be successful, however, they need to be able to fully integrate time cards with their financial systems – something that can be costly and time and resource intensive.

Our time card module is plug-and-play add-on that completely automates time card work flows in D365 for Field Service and allows you to manage workflows and track time spent on work orders, administrative functions, and paid time off across all devices – including mobile. The solution simplifies payroll and other time tracking processes right out of the box. There's no customization necessary -- saving you money and speeding time to value.

Business Outcomes:

- Reduces implementation costs and speeds time to value
- Extends the value of D365 for Field Service
- Eliminates data duplication & errors
- Simplifies and streamlines time card tracking and approval process
- Drives user adoption & efficiency
- Increases operational visibility
- Integrates fully with D365 resources and work order

Features and Capabilities

- **Automate Time Card Work Flows**
Pre-built functionality allow you to automatically capture, track, and manage work and non-work-related field service technician time – including work orders, administrative time, and paid time off. This simplifies payroll and other time tracking processes.
- **Centralized Dashboard**
The centralized time card dashboard and graphical interface makes it easy to learn and use. Approvers can quickly find time cards ready for approval -- there's no querying or searching required.

→ **Full Mobile Experience**

Pre-built functionality allow you to automatically capture, track, and manage work and non-work-related field service technician time — including work orders, administrative time, and paid time off. This simplifies payroll and other time tracking processes.

→ **Payroll and HR System Integration**

The module seamlessly connects field service to your payroll and HR processes, increasing efficiency, reducing errors, and enhancing visibility.

→ **Works Right Out-of-the-Box**

The Time Card Module is plug and play. It's up and running quickly and there's no customization necessary — saving time and money and speeding time to benefit.

→ **Automated Resource Booking**

The module integrates time entry with resource booking to ensure the schedule board reflects time off and time allocated to administrative tasks —giving service coordinators instant visibility of their resources in real time.

→ **Leverages the Power of the Platform**

Our time card module takes advantage of all the out-of-the-box features of D365. Resources, work orders, schedule board, time off requests, business process flows, and more are leveraged to provide a full and robust time card management system.

→ **One - Click Approvals**

Review and approve time cards with a single click — there's no cumbersome approval process to follow.

Why Hitachi Solutions

We offer deep industry expertise combined with decades of experience providing high-value solutions that deliver rapid return on investment. Our approach is designed to give you a faster, lower-risk implementation and rapid adoption through proven best practices.

- It starts with core technologies built on Microsoft Dynamics 365 so you can get up and running quickly
- We extend that with our own industry modules that give you capabilities tailored to the needs of your industry
- Finally we deliver a customized solution to provide the best fit for your business, so you can focus on your unique strengths, not on basic technology
