What is PowerApproval?

Tracking approvals are critical to many businesses, so why not track approvals in the system where all of your other business processes are kept – in Microsoft Dynamics 365. The PowerApproval add-on gives users the ability to build approval processes, decide, per step, who can approve that step, and place that approval process on any Dynamics 365 entity – even custom entities! PowerApproval lets users:

- Build a step by step approval process
- Determine, per step, who approves that step. It could be:
- A Dynamics user
- A Dynamics team
- The manager of the user who submitted the approval
- The manager of the previous step approver
- The manager of the owner of the record
- Approve/reject each step of the approval process
- Track which record are waiting for approval, and from who

Pricing and Requirements

A subscription to PowerApproval is $1 per user per month. All enabled users are automatically counted. This includes read only users, admin only users, and service accounts.

Solution Requirements:
ADFS forms based authentication
Any Online or on-premise implementation of:
